English**

Independent Auditor’s Report on Review of Interim Financial Information

To the Board of Directors of Burgan Bank A.Ş.

Introduction

We have reviewed the accompanying unconsolidated balance sheet of Burgan Bank A.Ş. (“the Bank”) as at 31 March 2026 and the unconsolidated statement of profit or loss, unconsolidated statement of profit or loss and other comprehensive income, unconsolidated statement of changes in shareholders’ equity, unconsolidated statement of cash flows for the three month period then ended and notes, comprising a summary of significant accounting policies and other explanatory information. The Bank Management is responsible for the preparation and fair presentation of these unconsolidated interim financial information in accordance with the “Banking Regulation and Supervision Agency (“BRSA”) Accounting and Reporting Legislation” which includes “Regulation on Accounting Applications for Banks and Safeguarding of Documents” published in the Official Gazette No.26333 dated 1 November 2006, and other regulations on accounting records of banks published by Banking Regulation and Supervision Board and circulars and interpretations published by BRSA and the requirements of Turkish Accounting Standard 34 “Interim Financial Reporting” for the matters not regulated by the aforementioned legislations. Our responsibility is to express a conclusion on these unconsolidated interim financial information based on our review.

Scope of Review

We conducted our review in accordance with the Standard on Review Engagements (SRE) 2410, “Review of Interim Financial Information Performed by the Independent Auditor of the Entity”. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review of interim financial information is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for Qualified Conclusion

As stated in Note 2.h.2.ii of Section Five, the accompanying unconsolidated interim financial information as at 31 March 2026 includes a free provision of TL 234,183 thousands, of which TL 214,183 thousands was recognized as expense in current period and TL 20,000 thousand had been recognized as expense in prior periods which does not meet the requirements of BRSA Accounting and Reporting Legislation. This free provision is provided by the Bank management for the possible effects of the negative circumstances which may arise in economy or market conditions.

Qualified Conclusion

Based on our review, except for the effects of the matter described in the Basis for Qualified Conclusion paragraph, nothing has come to our attention that causes us to believe that the accompanying unconsolidated interim financial information does not present fairly, in all material respects, the unconsolidated financial position of Burgan Bank A.Ş. as at 31 March 2026, and its unconsolidated financial performance and its unconsolidated cash flows for the three month period then ended in accordance with the BRSA Accounting and Reporting Legislation.

Report on Other Legal and Regulatory Requirements

Based on our review, nothing has come to our attention that causes us to believe that the interim financial information provided in the interim activity report included in section seven of the accompanying unconsolidated interim financial information is not consistent, in all material respects, with the reviewed unconsolidated interim financial information and explanatory notes.

BURGAN BANK A.Ş.
EXPLANATIONS AND NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS
AS OF 31 MARCH 2026

(Amounts expressed in thousands of Turkish Lira (“TL”) unless otherwise stated.)

SECTION ONE

GENERAL INFORMATION ABOUT THE BANK

I. BANK’S FOUNDATION DATE, START-UP STATUTE, HISTORY ABOUT THE CHANGES IN THIS MENTIONED STATUTE:

Tekfen Yatırım ve Finansman Bankası A.Ş. was established as an “investment bank” with the permission of the Council of Ministers No. 88/13253 on 26 August 1988 and authorised to conduct finance investment and foreign trade activities. Banking operations commenced on 7 August 1989.

Bank Ekspres A.Ş. (“Bank Ekspres”) was established with the permission of the Council of Ministers in decision No. 91/2316 on 22 September 1991; “The Decree of Establishment Permission” was published in the Official Gazette numbered 21017 and dated 10 October 1991. The Articles of Association was published in the Trade Registry Gazette numbered 2969 and dated 18 February 1992. The Turkish Savings Deposit and Insurance Fund (“SDIF”) took over the management of Bank Ekspres A.Ş. due to the poor fiscal structure of the Bank on 23 October 1998.

According to the Share Transfer Agreement signed between the SDIF and Tekfen Holding A.Ş. on 30 June 2001, 2,983,800,000 shares with a nominal value of Kr 1 each and which amount to 99.46% of the capital of Bank Ekspres A.Ş. under the control of the SDIF in accordance with Banking Law were transferred to Tekfen Holding A.Ş. Based on this agreement, the acquisition of Tekfen Yatırım ve Finansman Bankası A.Ş., where Tekfen Holding A.Ş. owns 57.69% of the Bank, by Bank Ekspres A.Ş. was permitted by the Banking Regulation and Supervision Agency’s (“BRSA”) decision numbered 489 dated 18 October 2001. The share transfers were realised on 26 October 2001 and the Bank’s name was changed to Tekfenbank Anonim Şirketi (the “Bank”), which had two main shareholders: Tekfen Holding A.Ş. with 57.30% and TST International S.A. with 40.62%.

EFG Eurobank Ergasias S.A. (“Eurobank EFG”) and Tekfen Holding A.Ş. (“Tekfen Group”) signed an agreement as of 8 May 2006, that anticipated Eurobank EFG to purchase Tekfen Group’s 70% share in Tekfenbank A.Ş and Tekfen Finansal Kiralama A.Ş which is fully owned by Tekfenbank; where Tekfen Group retained its strategic partnership by keeping all remaining shares. On 23 February 2007, the sale of Tekfenbank A.Ş. to Eurobank EFG Holding (Luxembourg) S.A. (“Eurobank EFG Holding”) was approved by the BRSA and the sale was completed after the share transfer on 16 March 2007.

Under the agreement regarding the sale of Eurobank Ergasias S.A.’s Turkey operations to Burgan Bank K.P.S.C. (formerly Burgan Bank S.A.K), 70% of the bank shares belonging to Eurobank EFG Holding (Luxemburg) S.A. and 29.26% of the shares belonging to Tekfen Holding A.Ş. are bought by Burgan Bank K.P.S.C. in 7 December 2012 in accordance with the Banking Regulation and Supervision Agency’s authorization, and then 99.26% of the Bank shares are turned over to Burgan Bank K.P.S.C. in 21 December 2012.

At the Extraordinary Board of Directors meeting on 23 January 2013, the title of the Bank has been decided to change from Eurobank Tekfen A.Ş. to Burgan Bank A.Ş. (“the Bank”), and has been registered to the Turkish Trade Registry as of 25 January 2013.

Burgan Bank K.P.S.C., which is the main shareholder with a share ratio of 99.41%, has completed the transfer transaction of its share corresponding to 52% of the Bank’s capital to Al Rawabi United Holding K.S.C.C., obtaining necessary approvals from the Banking Regulation and Supervision Agency on 13 November 2023. Kuwait Projects Company K.S.C.P., the actual main shareholder of Burgan Bank K.P.S.C., also owns 99.99% of the shares of Al Rawabi United Holding Company K.S.C.C. Therefore, there has been no change in the ultimate ownership of Burgan Bank A.Ş., as Kuwait Projects Company K.S.C.P., the actual main shareholder of Burgan Bank K.P.S.C., holds 99.99% of the shares of Al Rawabi United Holding Company K.S.C.C.

BURGAN BANK A.Ş.

The accompanying explanations and notes form an integral part of these financial statements.

SECTION THREE

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD

I. BASIS OF PRESENTATION:

a. The preparation of the financial statements and related notes and explanations in accordance with the Turkish Accounting Standards and Regulation on the Principles and Procedures Regarding Banks' Accounting Application and Keeping Documents:

The unconsolidated financial statements are prepared within the scope of the "Regulation on Accounting Applications for Banks and Safeguarding of Documents" related with Banking Act numbered 5411 published in the Official Gazette no.26333 dated 1 November 2006 and in accordance with the regulations, communiqués, interpretations and legislations related to accounting and financial reporting principles published by the Banking Regulation and Supervision Agency ("BRSA"), and in case where a specific regulation is not made by BRSA, "Turkish Accounting Standards" ("TAS") and "Turkish Financial Reporting Standards" ("TFRS") and related appendices and interpretations put into effect by Public Oversight Accounting and Auditing Standards Authority ("POA"). The format and content of the publicly announced unconsolidated financial statements and related disclosures to these statements have been prepared in accordance with the "Communiqué related to Publicly Announced Financial Statements of Banks and Explanations and Notes to related to these Financial Statements", published in the Official Gazette No. 28337, dated 28 June 2012, and changes and amendments to this Communiqué. The Bank maintains its accounting entries in Turkish Lira, in accordance with the Banking Law, Turkish Trade Law and the Turkish Tax Legislation.

The unconsolidated financial statements are prepared on a historical cost basis, except for financial assets and liabilities carried at fair value, buildings, and subsidiaries accounted for using the equity method. The amounts in the unconsolidated financial statements and notes related to these financial statements have been expressed in thousands of Turkish Lira, unless otherwise stated. The preparation of unconsolidated financial statements in conformity with TAS requires the use of certain critical accounting estimates by the Bank management to exercise its judgment on the assets and liabilities of the balance sheet and contingent issues as of the balance sheet date. These estimates, which include the fair value calculations of financial instruments and impairments of financial assets are being reviewed regularly and, when necessary, suitable corrections are made and the effects of these corrections are reflected to the income statement. Assumptions and estimates that are used in the preparation of the accompanying financial statements are explained in the following related disclosures.

According to the Financial Reporting Standard for High Inflationary Economies (TAS 29), entities whose functional currency is the currency of a high inflationary economy report their financial statements in terms of the purchasing power of the currency at the end of the reporting period. TAS 29 identifies characteristics that may indicate an economy as high inflationary. Furthermore, according to TAS 29, all entities reporting in the currency of a high inflationary economy are required to apply this Standard from the same date. Therefore, to ensure consistency in application nationwide, it is expected that all entities will commence applying TAS 29 simultaneously, following an announcement by the Public Oversight, Accounting, and Auditing Standards Authority as stated in TAS 29.

With its announcement dated 23 November 2023, the Public Oversight, Accounting, and Auditing Standards Authority (POA) stated that the financial statements of entities applying the Turkish Financial Reporting Standards, for annual reporting periods ending on or after 31 December 2023, should be prepared in accordance with the Financial Reporting Standard for High Inflationary Economies ("TAS 29").

BURGAN BANK A.Ş.

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AS OF 31 MARCH 2026

(Amounts expressed in thousands of Turkish Lira (“TL”) unless otherwise stated.)

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):

I. BASIS OF PRESENTATION (Continued):

a. The preparation of the financial statements and related notes and explanations in accordance with the Turkish Accounting Standards and Regulation on the Principles and Procedures Regarding Banks’ Accounting Application and Keeping Documents (Continued):

However, it was also mentioned that institutions authorized to regulate and supervise in their respective fields may determine different transition dates for the application of TAS 29 provisions. In response to POA's announcement, the Banking Regulation and Supervision Agency (BRSA) decided through its decision numbered 10744 dated 12 December 2023, that banks, financial leasing, factoring, financing, savings finance, and asset management companies would not be subject to inflation adjustment for their financial statements ending on December 31, 2023, under TAS 29. According to the decision numbered 10825 dated 11 January 2024, by BRSA, it was decided that banks, financial leasing, factoring, financing, savings finance, and asset management companies would transition to inflation accounting from 1 January 2025, onwards. However, with the decision numbered 11021 dated 5 December 2024, by BRSA, it was decided that banks, financial leasing, factoring, financing, savings finance, and asset management companies will not apply inflation accounting in 2025. Thereafter, pursuant to BRSA decision numbered 11340 dated 18 December 2025, decision 10825 dated 11 January 2024 was repealed, confirming that banks, financial leasing, factoring, financing, savings finance, and asset management companies’ financial statements would not implement inflation adjustment as required under TAS 29.

b. Information on accounting policies and changes in financial statements:

None.

II. EXPLANATIONS ON STRATEGY OF USING FINANCIAL INSTRUMENTS AND FOREIGN CURRENCY TRANSACTIONS:

The overall strategy of the Bank of using financial instruments is to sustain an optimal balance between the yield of financial instruments and their risks. The most important funding source of the Bank is deposits. The Bank can also sustain a lengthened liability structure by using long-term borrowings from foreign financial institutions. Funds obtained from deposits and other sources are invested in high yield and quality financial assets and currency, interest rate and liquidity risks are being kept within the limits following the asset-liability management strategy. The currency, interest and liquidity risks of on-balance sheet and off-balance sheet assets and liabilities are managed accordingly within the risk limits accepted by the Bank and the related legal limits. Derivative instruments are mainly utilized for liquidity needs and for mitigating currency and interest rate risks. The position of the Bank as a result of foreign currency activities being held within the legal limits and the exposed currency risk is followed within the determined levels by the Board of Directors by considering the limits given by the Banking Law.

Foreign currency denominated monetary assets and liabilities are translated with the Bank’s foreign currency bid rates prevailing at the balance sheet date and related gains and losses arising from these translations are recognized in the income statement under the account of “Foreign exchange gains/losses”.

As of 31 March 2026, the USD exchange rate used in the conversion of foreign currency transactions into Turkish currency and their reflection in the financial statements is TL 44.3961 and the Euro exchange rate is TL 50.9294.

BURGAN BANK A.Ş.

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AS OF 31 MARCH 2026

(Amounts expressed in thousands of Turkish Lira (“TL”) unless otherwise stated.)

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):

III. EXPLANATIONS ON CONSOLIDATED SUBSIDIARIES:

Unconsolidated financial associates are recognized according to equity method in the framework of TAS 28 Communique on Investments in Subsidiaries and Associates with respect to TAS 27 Separate Financial Statements Communique in unconsolidated financial statements. Associates, which were recognized with cost value in the unconsolidated financial statement previously, are recognized according to equity method as of 31 December 2015 along with the year-end of 2015. Under the equity method, the Bank’s share of the assets of associates and subsidiaries is reflected in the financial statements. The Bank’s share of the profit or loss of associates and subsidiaries is included in the Bank’s profit or loss, while the Bank’s share of their other comprehensive income or expense is included in the Bank’s other comprehensive income or expense. Changes arising during the period in the relevant associates and subsidiaries, such as mergers/acquisitions, alignment with group accounting policies, and similar adjustments, are presented under the “Increase/Decrease Due to Other Changes” item in the Statement of Changes in Equity. Non-financial subsidiaries are recognized in the financial statements at cost, less any provision for impairment, in accordance with TAS 27. Burgan Teknoloji A.Ş., being a non-financial institution, is not consolidated in the Bank’s consolidated financial statements in accordance with the “Communiqué on the Preparation of Consolidated Financial Statements of Banks.”

The Bank has no joint ventures as of 31 March 2026 and 31 December 2025.

IV. EXPLANATIONS ON FORWARD TRANSACTIONS, OPTIONS AND DERIVATIVE INSTRUMENTS:

The major derivative instruments utilized by the Bank are currency and interest rate swaps, cross currency swaps, currency options and currency forwards.

The Bank’s derivative instruments are classified under TFRS 9 as either “Derivative Financial Assets at Fair Value Through Profit or Loss” or “Derivative Financial Assets at Fair Value Through Other Comprehensive Income.” TFRS 9 provides an option in accounting policy choice to defer the adoption of hedge accounting under TFRS 9 and continue applying hedge accounting under TAS 39. Within this scope, the Bank continues to apply TAS 39 for hedge accounting purposes. Derivative transactions are recorded in accordance with their fair value on the contract date. Also, liabilities and receivables arising from derivative instruments are followed in the off-balance sheet accounts from their contractual values.

Derivative instruments are measured at their fair values in the periods following their recording and are disclosed under assets or liabilities in the “Derivative Financial Assets at Fair Value Through Profit or Loss” section according to whether their fair value is positive or negative. Differences in the fair value of trading derivative instruments are reflected to the income statement. The fair values of the derivative financial instruments are calculated by using quoted market prices or by using discounted cash flow models.

As of 31 March 2026, the Bank applies cash flow hedge accounting through cross and interest currency swaps to protect against changes in interest rates of deposits which have average maturities of up to 3 months. The Bank implements effectiveness tests at the balance sheet dates for hedge accounting, the effective parts are accounted as defined in TAS 39, on the financial statements under equity “Accumulated Other Comprehensive Income or Expense To Be Reclassified Through Profit or Loss”, whereas the amount concerning ineffective parts is associated with the income statement.

In cash flow hedge accounting, when the hedging instrument expires, is executed or sold and when the hedge relationship becomes ineffective or is discontinued as a result of the hedge relationship being revoked; the hedging gains and losses that were previously recognized under equity are transferred to profit or loss when

BURGAN BANK A.Ş.**NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AS OF 31 MARCH 2026**

(Amounts expressed in thousands of Turkish Lira (“TL”) unless otherwise stated.)

the cash flows of the hedged item are realized.

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):**V. EXPLANATIONS ON INTEREST INCOME AND EXPENSES:**

Interest income is recognised using the effective interest rate method as defined in IFRS 9 (i.e. the rate that exactly discounts the estimated future cash flows of a financial asset or liability to their net present value). Except for purchased or originated credit-impaired financial assets and financial assets that were not credit-impaired on initial recognition but subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset. In applying the effective interest rate method, the Bank identifies fees that are an integral part of the effective interest rate of the financial instrument. Unless the financial instrument is measured at fair value through profit or loss, fees that are an integral part of the effective interest rate are treated as an adjustment to the effective interest rate. In such cases, these fees are recognised in profit or loss as income or expense when the financial instrument is initially recognised.

The Bank amortises the fees included in the calculation of the effective interest rate, transaction costs and other premiums or discounts over the expected life of the financial instrument when applying the effective interest method.

If the expectations regarding the cash flows of a financial asset are revised for reasons other than credit risk, the change is reflected in the carrying amount of the asset and the related income statement item, and is amortised over the remaining expected life of the financial instrument.

If a financial asset becomes credit-impaired and is classified as non-performing, the Bank, in subsequent reporting periods, applies the effective interest rate to the amortised cost of such financial assets. The calculation of the related interest income is performed on a contract-by-contract basis for all financial assets subject to impairment assessment. In the expected credit loss models, the effective interest rate is used in calculating the loss given default, and the expected credit loss calculation also includes the related interest amount.

VI. EXPLANATIONS ON FEE AND COMMISSION INCOME AND EXPENSES:

Fees and commission income/expenses are primarily recognized on an accrual basis or “Effective interest (internal efficiency rate) method” according to the nature of the fee and commission, except for certain commission income and fees for various banking services which are recorded as income at the time of collection. Contract based fees or fees received for services such as the purchase and sale of assets on behalf of a third party or legal person are recognized as income at the time of collection. The commissions and fees other than those whose amortised costs are integral part of their effective profit rate, are accounted over time in accordance with the TFRS 15 Revenue From Contracts With Customers Standard.

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):

VII. EXPLANATIONS ON FINANCIAL ASSETS:

Initial recognition of financial instruments

In the initial recognition of financial instruments, their classification depends on the contractual terms and the relevant business model. Except for an asset evaluated within the scope of TFRS 15 Revenue from Contracts with Customers, a financial asset or financial liability is measured at fair value when first recognized in the financial statements. In the initial measurement of financial assets and liabilities other than those measured at fair value through profit or loss, transaction costs directly attributable to their acquisition or issuance are also added to or deducted from the fair value.

Classification of financial instruments

At the initial recognition of financial instruments, the category in which they will be classified depends on the relevant business model used by management and the characteristics of the contractual cash flows.

The Bank classifies and accounts its financial assets as “Financial Assets at Fair Value Through Profit/Loss”, “Financial Assets at Fair Value Through Other Comprehensive Income” or “Financial Assets Measured at Amortized Cost”. Such financial assets are recognized or derecognized according to TFRS 9 Financial Instruments Part 3 “Classification and Measurement of Financial Instruments” published in the Official Gazette No. 29953 dated 19 January 2017 by the Public Oversight Accounting and Auditing Standards Authority. Financial assets are measured at fair value at initial recognition in the financial statements. During the initial recognition of financial assets other than “Financial Assets at Fair Value Through Profit or Loss”, transaction costs are added to fair value or deducted from fair value.

The Bank recognizes a financial asset into the financial statements when it becomes a party to the contractual terms of a financial instrument. During the first recognition of a financial asset into the financial statements, the business model determined by the Bank management and the nature of contractual cash flows of the financial asset are taken into consideration. When the business model determined by the Bank’s management is changed, all affected financial assets are reclassified and this reclassification is applied prospectively. In such cases, no adjustments are made to earnings, losses or interests that were previously recorded in the financial statements.

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):

VII. EXPLANATIONS ON FINANCIAL ASSETS (Continued):

a. Financial assets at fair value through profit/loss:

Financial assets at fair value through profit or loss are financial assets other than the ones that are managed with business models that aim to hold contractual cash flows in order to collect them and the ones that are managed with business models that aim to collect both the contractual cash flows and cash flows arising from the sale of the assets; If the contractual terms of the financial asset do not lead to cash flows representing solely payments of principal and interest at a certain date; that are either acquired for generating a profit from short-term fluctuations in prices or are financial assets included in a portfolio aiming to short-term profit making. Financial assets at fair value through profit or loss are initially recognized at fair value and are remeasured at their fair value after recognition. All gains and losses arising from these valuations are reflected in the profit/loss accounts.

b. Financial assets at fair value through other comprehensive income:

In addition to financial assets within a business model that aims to hold to collect contractual cash flows and aims to hold to sell, financial assets with contractual terms that lead to cash flows are solely payments of principal and interest at certain dates, are classified as fair value through other comprehensive income.

Financial assets at fair value through other comprehensive income are recognized by adding transaction cost to acquisition cost reflecting the fair value of the financial asset. After the recognition, financial assets at fair value through other comprehensive income are re-measured at fair value. Interest income calculated with the effective interest rate method arising from financial assets at fair value through other comprehensive income and dividend income from equity securities are recorded to statement of profit or loss. Unrealized gains and losses, arising from the difference between the amortized cost and the fair value of financial assets at fair value through other comprehensive income are not reflected in the statement of profit or loss of the period until the acquisition of the asset, sale of the asset, the disposal of the asset, and impairment of the asset and they are accounted under the "Accumulated Other Comprehensive Income or Expense To Be Reclassified Through Profit or Loss" under shareholders' equity. When the mentioned marketable securities are collected or sold, the accumulated losses through fair value are reflected on the statement of profit or loss.

Equity securities, which are classified as financial assets at fair value through other comprehensive income, that have a quoted market price in an active market and/or whose fair values can be reliably measured are carried at their fair value. However, in certain exceptional cases, cost may be an appropriate estimation method for determining fair value. This is possible when the cost best reflects the estimate of fair value. In case of disposal of the equity investment, the accumulated total gain or loss is followed in the "Other Accumulated Comprehensive Income or Expense that cannot be reclassified to Profit or Loss."

During initial recognition, an entity can make an irrevocable decision, by choosing to record the changes of the fair value of the investment in an equity instrument that is not held for trading purposes in other comprehensive income. If this choice is made, the dividends from the investment are taken into the financial statements as profit or loss.

BURGAN BANK A.Ş.

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AS OF 31 MARCH 2026

(Amounts expressed in thousands of Turkish Lira (“TL”) unless otherwise stated.)

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):

VII. EXPLANATIONS ON FINANCIAL ASSETS (Continued):

c. Financial assets measured at amortized cost:

Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are classified as financial assets measured at amortized cost. Financial assets measured at amortized cost are initially recognized at their acquisition cost including the transaction costs which reflect the fair value of those instruments and are subsequently recognized at “Amortized Cost” by using “Effective Interest (Internal efficiency rate)” method. Interest income obtained from financial assets measured at amortized cost are accounted in the income statement.

Additionally, the Bank's securities portfolio includes inflation-linked government bonds, which are classified as financial assets measured at fair value through other comprehensive income and financial assets measured at amortized cost. These securities are indexed to the Consumer Price Index (CPI). They are valued and accounted for using the effective interest method based on the index calculated considering the real coupon rates and the inflation index at the issuance date along with the estimated inflation rate. As stated in the Treasury Undersecretariat's Investor Guide for CPI-Linked Bonds, the reference indices used for calculating the actual coupon payment amounts for these securities are based on the CPI from two months prior. The Bank determines the estimated inflation rate accordingly. The estimated inflation rate, taking into account the expectations of the Central Bank of the Republic of Turkey and the Bank, is updated as deemed necessary throughout the year.

d. Loans:

Loans are financial assets that have fixed or determinable payment terms and are not quoted in an active market. Loans are initially recognized at acquisition cost plus transaction costs presenting their fair value and thereafter measured at amortized cost using the “Effective Interest Rate (Internal Rate of Return)” method.

The Bank's loans are recorded under the “Measured at Amortized Cost” account.

Write-down policy is explained in, section V, the explanations and notes related to assets.

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):**VIII. EXPLANATIONS ON EXPECTED CREDIT LOSSES:**

The Bank allocates impairment for expected loss on financial assets measured at amortized cost and measured at fair value through other comprehensive income.

As of 1 January 2018, in accordance with the Communiqué related to "Procedures and Principals regarding Classification of Loans and Allowances Allocated for Such Loans" published in the Official Gazette no. 29750 dated 22 June 2016, the Bank has started to allocate a loss allowance for expected credit losses on financial assets and loans measured at amortized cost in accordance with TFRS 9. In this context, as of 1 January 2018, the credit loss allowance method within the framework of the BRSA's related legislation has been changed to the loss allowance for expected credit losses model with the implementation of TFRS 9. The predictions of expected credit loss forecasts include credible information which is objective, probability-weighted, supportable about past events, current conditions, and forecasts of future economic conditions. The Bank recognizes expected credit loss provisions for all loans measured at amortized cost, financial assets, and non-cash loans together with financial assets measured at fair value through other comprehensive income. Financial assets measured at fair value are not subject to impairment. In accordance with TFRS 9, the Bank assesses all financial instruments for which there has been a significant increase in credit risk since initial recognition, taking into account all reasonable and supportable information, including forward-looking data. If, at the reporting date, there has been no significant increase in the credit risk of a financial instrument since initial recognition, the Bank measures the related expected credit loss provision at an amount equal to the 12-month expected credit losses. However, if a significant increase in credit risk is observed after initial recognition, the expected credit loss provision for the financial instrument is measured at an amount equal to the lifetime expected credit losses. The Bank calculates and recognizes expected credit loss provisions either collectively or individually for exposures with similar credit risk characteristics. The Bank has established a policy to assess, over the remaining life of a financial asset, whether a significant increase in credit risk has occurred since initial recognition, taking into account the probability of default.

Calculation of Expected Credit Loss

Credit loss is the present value, discounted at the instrument's original effective interest rate, of the difference between all contractual cash flows that the Bank is entitled to receive and all cash flows that the Bank expects to collect. The Bank estimates the cash flows over the expected life of the financial instrument by considering all contractual terms and takes into account the weighted average of credit losses according to the probability of the related default events as the expected credit loss. TFRS 9 Financial Instruments allows expected credit loss provisions to be calculated either collectively or individually by grouping financial assets with shared credit risk characteristics. When the Bank calculates the expected credit loss individually for financial instruments, it assesses the possible outcomes of credit loss and the likelihood of these outcomes occurring in order to determine the risk of credit loss. Accordingly, the estimated expected credit losses are calculated to reflect an unbiased and probability-weighted amount considering the range of possible outcomes.

In the collective assessment of expected credit losses, financial assets are grouped based on shared credit risk characteristics, and the expected credit loss is calculated using the relevant risk parameters. Expected credit losses are measured on a 12-month or lifetime basis, depending on whether there has been a significant increase in credit risk since initial recognition. The expected credit loss is calculated using the components of Probability of Default, Loss Given Default, and Exposure at Default.

In the calculation of expected credit losses, macroeconomic indicators are taken into account when determining the Probability of Default component. Forward-looking macroeconomic forecasts are incorporated into the expected credit losses using multiple scenarios.

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):

VIII. EXPLANATIONS ON EXPECTED CREDIT LOSSES (Continued):

Forward-looking macroeconomic information is incorporated into the risk parameters used in TFRS 9 calculations. When including macroeconomic information, econometric models and forecasts reflecting the relationships between model risk parameters and macroeconomic variables are taken into account. The main macroeconomic indicators forming these forecasting models include metrics such as Turkey's real gross domestic product growth rate, consumer price index, and unemployment rate. The macroeconomic forecasting models include three scenarios, and in the calculation of expected credit losses, the relevant scenarios are considered according to their respective weights. A five-year forecast horizon is used for forward-looking projections. The Bank updates the macroeconomic variables used in its expected credit loss calculations at least once a year and applies them to the models. There is no management adjustment to the Bank's TFRS 9 model.

The The expected credit loss calculation is carried out by considering three different scenarios: optimistic, pessimistic, and base. The final provisions are calculated by weighting them according to the probabilities of each scenario.

In order to collectively recognize the expected credit loss in the financial statements, loans with similar characteristics were segmented using the models developed under TFRS 9. When establishing the segmentation structure, customer type (retail or corporate/commercial) and product type are taken into account.

The basic parameters used in the calculations of provision are described below:

Probability of Default : It is defined as the likelihood that a borrower will be unable to meet its obligations to the Bank, or in other words, fail to repay its debt to the Bank. This ratio is calculated individually for each loan based on various statistical assumptions, depending on the type of the credit, rating or score, maturity, cash flows, and other relevant criteria.

Based on TFRS 9, two different PDs are considered in calculations:

- **12-month PD:** The probability of default occurring within the next 12 months following the balance sheet date.
- **Lifetime PD:** The probability of default occurring over the remaining life of the loan.

The Bank generates ratings for the corporate and commercial customers via internal rating system and the 12-month or lifetime probability of defaults are estimated based on these ratings. Macroeconomic expectations are taken into account when carrying out these expectations and the weighted average of the probabilities of default calculated from three different scenarios are considered as the final probability of default.

For retail customers, the score point is generated via the internal scoring system and the 12-month or lifetime probabilities of default are estimated based on these score points by considering the above-mentioned macroeconomic factors.

For the receivables from customers such as sovereign and banks, provision is calculated by using the determined values in the corporate and commercial probability of default table and the loss given default rates.

Default Rate is determined by taking into account historical data, current conditions, and forward-looking macroeconomic expectations (scenarios) and is updated periodically.

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):**VIII. EXPLANATIONS ON EXPECTED CREDIT LOSSES (Continued):**

Loss Given Default Rate: The expected credit loss calculation is carried out by considering three different scenarios: optimistic, pessimistic, and base. The final provisions are calculated by weighting them according to the probabilities of each scenario.

It is the parameter that shows, as a percentage, the economic loss the Bank would incur in the event of default. LGD rates are established by taking into account collateral information, haircut rates, and default amounts, which are considered as risk determinants of the portfolios, and are regularly reviewed. In calculating expected credit losses for Stage 3 loans, increasing LGD rates reflecting the post-default collection cycle are used, taking into account the time in default and historical collection performance. If the time in default exceeds a certain level and the additional period does not lead to a significant change in the expected loss, it is assumed that the LGD rate for the relevant loans is 100%, and it is considered that there is no expectation of further collection. In the Bank's LGD estimates, changes in post-default collection performance and collateral valuation assumptions are monitored, and parameters are updated when deemed necessary.

Exposure at Default: It is the parameter that shows the amount of a loan that would default. For a spot or installment loan, the default amount is the amount indicated in the payment schedule at the date of default. However, for credit cards, overdraft accounts, and off-balance-sheet loans, the default amount is calculated using a parameter called the Credit Conversion Factor (CCF). Since the risk amount for overdraft accounts and credit cards depends on the limit committed by the Bank, and the future exposure in the event of default cannot be known at the time the loan is granted, it is estimated by multiplying by the credit conversion factor.

The Bank includes forward-looking macroeconomic data into its calculation of expected credit losses to assess default probabilities for corporate and commercial customers. In this context, the default rate for future periods is estimated based on Turkey's annual real Gross Domestic Product (GDP) growth rate. Estimates for the macroeconomic variable are determined according to three different scenarios: pessimistic, base and optimistic, to be used in the expected credit loss calculation. Final values are reached through the weighted average of expected credit losses produced in the relevant scenarios.

These financial assets are divided into three categories depending on the gradual increase in credit risk observed since their initial recognition:

Stage 1:

These are the financial assets at initial recognition or financial assets that do not have a significant increase in credit risk since their initial recognition. Impairment for credit risk for these assets is accounted in the amount of 12-month expected credit losses. Therefore, the expected probability of default of 12 months is calculated by considering the maturity of the loan. This value is obtained after weighting the three macroeconomic scenarios and the provision is calculated using the loss given default and risk amounts calculated by taking into consideration the collateral composition of the loan.

Accordingly, the 12-month expected credit loss is calculated based on the 12-month probability of default (PD) for default events expected to occur within 12 months following the reporting date, multiplied by the loss given default (LGD) and the default amount (DA) for the relevant period. In this calculation, 12-month probabilities of default (PD) under positive, negative, and base scenarios reflecting forward-looking macroeconomic expectations, as well as other parameters (LGD, DA, discount rate), are used to calculate the expected credit loss for each scenario, and then each value is weighted to arrive at the final expected credit loss of the loan. If classified under Group 1 Standard-Grade Loans (Stage 1), the 12-month expected credit loss is calculated over 365 days even if the maturity of the utilized loans exceeds one year. In cases where the loan maturity is less than one year, the remaining days to maturity (excluding revolving loans and credit cards) are used in the calculations.

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):

VIII. EXPLANATIONS ON EXPECTED CREDIT LOSSES (Continued):

Stage 2:

As of the reporting date of the financial asset, in the event of a significant increase in credit risk since initial recognition, the financial asset is transferred to Stage 2. Impairment for credit risk is accounted on the basis of the financial asset's lifetime expected credit losses. The provision which will be allocated for the loan is calculated by considering the maturity and cash flow of the loan for three macroeconomic scenarios as stated above. For this purpose, the probability of default and the loss given default amounts are estimated not only for 12 months but also for the whole life of the loan and the loan provision is determined by using the present value set calculated over the cash flow.

Stage 3:

Stage 3 includes financial assets that have objective evidence of impairment at the reporting date. For these assets, lifetime expected credit losses are recognized. The method is similar to the methodology applied for Stage 2 loans, but the probability of default is considered 100% in these calculations. In general the Bank follows the definition of default in the legislation (objective default definition, for example the criterion of the number of days past due). On the other hand, if it is decided that the debt will not be paid, the aforementioned receivable will be considered as Stage 3, even if the default has not occurred yet.

Lifetime Expected Credit Loss

Expected credit losses arising from all possible default events over the life of a financial instrument. The TFRS 9 standard states that "if the credit risk on a financial instrument has increased significantly since initial recognition in the financial statements, at each reporting date, the entity measures the loss allowance for that financial instrument at an amount equal to lifetime expected credit losses."The Bank carries out its determination regarding the significant increase in credit risk by taking into consideration of the following criterias:

If a customer or loan is classified under Group 2 Loans under Close Monitoring (Stage 2) or Non-Performing Loans (Stage 3), the lifetime expected credit loss for the utilized loans is calculated based on the probabilities of default over the entire life of the loans. Accordingly, the lifetime expected credit loss is determined by multiplying the probability of default (PD) for the relevant period by the loss given default (LGD) and the default amount (DA). In this calculation, the expected credit loss calculated under optimistic, pessimistic, and base scenarios reflecting forward-looking macroeconomic expectations is weighted based on the probabilities assigned to each scenario to arrive at the final allowance.

While the methods for calculating expected credit loss for Stage 2 and Stage 3 loans are similar, the probability of default for Stage 3 loans is assumed to be 100%. Additionally, in calculating expected credit losses for Stage 3 loans, increasing LGD rates reflecting the post-default collection cycle are used, taking into account the time in default. If the time in default exceeds a certain level and the additional period does not result in a significant change in the expected loss, the LGD rate for the relevant loans is assumed to be 100%, and it is considered that no further collections are expected.

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):**VIII. EXPLANATIONS ON EXPECTED CREDIT LOSSES (Continued):****Definition of Default**

Although the TFRS 9 Standard does not provide a direct definition of default, it requires that a definition consistent with that used in credit risk management be applied. When defining default for the purpose of determining the entity’s credit risk under TFRS 9, the Bank uses a definition consistent with that applied for internal credit risk management purposes for the relevant financial instrument and, where appropriate, considers qualitative indicators (e.g., financial covenants). However, unless the entity has reasonable and supportable information indicating that default would occur earlier, there is a presumption that default occurs when the financial instrument is 90 days past due.

The definition of default used for these purposes considers a 90-day delinquency period in accordance with the provision that “unless information is obtained demonstrating that another definition of default is more appropriate for a specific financial instrument, it is applied consistently to all financial instruments”, in line with the definition of default under the Communiqué on the Calculation of Exposure at Default Using Internal Ratings-Based Approaches, a debt is considered to be in default if at least one of the following two conditions occurs: a) The Bank concludes that the debtor is unable to fully meet its obligations to the Bank or to a subsidiary that qualifies as a consolidated financial institution without recourse to collateral; b) The debtor is more than 90 days past due in fulfilling a material obligation to the Bank or to a subsidiary that qualifies as a consolidated financial institution. For loans classified as non-performing (Stage 3), the expected credit loss calculation is performed using an estimate of the Loss Given Default (LGD). This estimation is based on collateral information, haircut rates, and the default amount.

Portfolios with Low Credit Risk

The TFRS 9 Standard states that, for certain portfolios where historical default data is unavailable and reliable results cannot be produced, expected credit loss may be calculated using a low default rate. The relevant provision in the standard is explained as follows: “If, at the reporting date, a financial instrument is determined to have low credit risk, an entity may assume that the credit risk on the financial instrument has not increased significantly since initial recognition.” At the Bank, these transactions are classified as: a) CBRT Transactions (funds held at the Central Bank of the Republic of Turkey and required reserves), b) Securities (financial assets at fair value through other comprehensive income and financial assets measured at amortized cost), c) Interbank Transactions.

Significant Increase in Credit Risk

A significant increase in credit risk requires the Bank to account for expected credit losses based on Lifetime Expected Credit Loss instead of 12-Month Expected Credit Loss. Accordingly, if there is a significant increase in credit risk after initial recognition in the financial statements, the relevant financial asset is transferred to Stage 2.

In determining a significant increase in credit risk, the Bank performs qualitative and quantitative assessments. Under TFRS 9, a holistic approach is adopted in evaluating changes in credit risk; while quantitative criteria are primarily considered, qualitative indicators are also included in the assessment. The Bank uses an approach based on the deterioration of the customer’s rating in determining a significant increase in credit risk according to quantitative criteria.

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):

VIII. EXPLANATIONS ON EXPECTED CREDIT LOSSES (Continued):

The Bank determines a significant increase in credit risk by taking into account the following criteria:

- Type of customer (calculations are made on separate models for corporate and commercial customers and retail customers).
- Internal rating scores (calculations are based on score points for retail customers and ratings for corporate and commercial customers).
- The deterioration observed in the internal rating score between the drawdown date and the reporting date.

Qualitative Assessment: As a result of the qualitative assessment, the Bank classifies the relevant financial asset as Stage 2 (Significant Increase in Credit Risk) if any of the following conditions are met:

- Receivables that are more than 30 days past due as of the reporting date
- Receivables under close monitoring
- Situations where the payment plan has been changed due to refinancing, restructuring, or concessions and such changes cannot be explained by commercial reasons
- Customers assessed as high-risk under the Bank's prudential principle

An exception to this item applies to firms whose rating has decreased by 5 notches or more since the date the loan was granted, and whose final rating after this decrease is 7 or 7-, and for which the PD (Probability of Default) determined from the final rating is below 1%.

In addition to the above rules, the Bank also provides additional provisions through individual assessment.

BURGAN BANK A.Ş.**NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AS OF 31 MARCH 2026**

(Amounts expressed in thousands of Turkish Lira (“TL”) unless otherwise stated.)

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):**IX. EXPLANATIONS ON OFFSETTING FINANCIAL ASSETS:**

Financial assets and liabilities are offset and the net amount is reported in the balance sheet when the Bank has a legally enforceable right to offset the recognized amounts and there is an intention to collect/pay related financial assets and liabilities on a net basis, or to realize the asset and settle the liability simultaneously.

X. EXPLANATIONS ON SALES AND REPURCHASE AGREEMENTS AND SECURITIES LENDING TRANSACTIONS:

Securities subject to repurchase agreements (“Repo”) are classified as “Financial assets at fair value through profit or loss”, “Financial assets at fair value through other comprehensive income” and “Measured at amortized cost” according to the investment purposes of the Bank and measured according to the portfolio to which they belong. Funds obtained from repurchase agreements are accounted under “Funds Provided under Repurchase Agreements” in liabilities and the difference between the sale and repurchase price is accrued over the life of repurchase agreements using the effective interest method.

Funds given against securities purchased under agreements (“Reverse repo”) to resell are accounted under “Receivables from Reverse Repurchase Agreements” on the balance sheet. The difference between the purchase and determined resell price is accrued over the life of repurchase agreements using the “Effective Interest Rate (Internal Efficiency) method”. The Bank has no securities lending transactions.

XI. EXPLANATIONS ON TANGIBLE ASSETS HELD FOR RESALE, DISCONTINUED OPERATIONS AND LIABILITIES REGARDING THOSE ASSETS:

Under IFRS 5, ‘Non-current Assets Held for Sale and Discontinued Operations,’ a non-current asset (or a disposal group of assets) classified as held for sale is measured at the lower of its carrying amount and fair value less costs to sell. In order to classify an asset as held for sale, only when the sale is highly probable, experienced quite often and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale. Highly saleable condition requires a plan by the management regarding the sale of the asset to be disposed (or else the group of assets), together with an active program for determination of buyers as well as for the completion of the plan. Also the asset (or else the group of assets) shall be actively marketed in conformity with its fair value. On the other hand, the sale is expected to be journalized as a completed sale within one year after the classification date; and the necessary transactions and procedures to complete the plan should demonstrate the fact that the possibility of making significant changes or cancelling the plan is low. Various circumstances and conditions could extend the completion period of the sale more than one year. If such delay arises from any events and conditions beyond the control of the entity and if there is sufficient evidence that the entity has an ongoing disposal plan for these assets, such assets (or else group of assets) are continued to be classified as assets held for sale.

The Bank has no discontinued operations.

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):

XII. EXPLANATIONS ON GOODWILL AND OTHER INTANGIBLE ASSETS:

a. Goodwill:

As at 31 March 2026, the Bank has no goodwill (31 December 2025: None).

b. Other intangible assets

Intangible assets are measured at cost on initial recognition and any directly attributable costs of setting the asset to work for its intended use are included in the initial measurement. Subsequently, intangible assets are carried at historical costs after the deduction of accumulated amortization and the provision for value decreases, if any.

Intangibles are amortized over their estimated useful lives using the straight-line method. The useful life of the asset is determined by assessing the expected useful life of the asset, technical, technological and other kinds of obsolescence and all required maintenance expenses necessary to utilize the economic benefit of the asset and differs from 3 years to 15 years.

XIII. EXPLANATIONS ON TANGIBLE ASSETS:

Tangible assets is measured at its cost when initially recognised and any directly attributable costs of setting the asset in working order for its intended use are included in the initial measurement. Subsequently, tangible assets are carried at cost less accumulated depreciation and provision for value decrease, if any.

The Bank has adopted the “revaluation method” in accordance with the “Communiqué Regarding the Principles and Procedures for the Tangible Assets (TAS 16)” for its buildings. Independent expert appraisal values are presented in the financial statements. Within this framework, for real estate recorded in the Bank’s inventory, valuation differences arising from appraisals conducted by independent appraisal firms are recognized under equity in the line item revaluation surplus of tangible and intangible assets.

Depreciation is calculated over the cost of tangible assets using the straight-line method. The depreciation rates are stated below:

Buildings	2%
Movables, Movables Acquired by Financial Leasing	2-50%

The depreciation charge for items remaining in tangible assets for less than an accounting period at the balance sheet date is calculated in proportion to the period the item remained in tangible assets.

When the carrying amount of an asset is greater than its estimated “Net realizable value”, it is written down to its “Net realizable value” and the provision for the diminution in value is associated with expense accounts.

Gains and losses on the disposal of tangible assets are determined by deducting the net book value of the tangible assets from its sales revenue.

Expenditures for the repair and renewal of tangible assets are recognised as expense. The capital expenditures made in order to increase the capacity of the tangible asset or to increase its future benefits are capitalised on the cost of the tangible asset. The capital expenditures include the cost components which are used either to increase the useful life or the capacity of the asset, or the quality of the product or to decrease the costs.

BURGAN BANK A.Ş.

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AS OF 31 MARCH 2026

(Amounts expressed in thousands of Turkish Lira ("TL") unless otherwise stated.)

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):

XIV. EXPLANATIONS ON LEASING TRANSACTIONS:

The Bank records its tangible assets obtained via leasing by taking into consideration the "lower of the fair value of the leased asset and the present value of the amount of cash consideration given for the leased asset".

Leased assets are included in the tangible assets and depreciation is charged on a straight-line basis over the useful life of the asset. If there is any diminution in value of the leased asset, a "Provision for impairment" is recognised. Liabilities arising from the leasing transactions are included in "Financial Lease Payables" on the balance sheet. Interest and foreign exchange expenses regarding lease transactions are charged to the income statement.

With the "TFRS 16 Leases" standard, which became effective as of 1 January 2019, the difference between the operating lease and financial lease has been removed, and lease transactions have started to be recognized under "Tangible Tangible assets" as an asset (right to use asset) and under "Lease Payables" as a liability.

The Bank has applied the changes in accounting policies due to the initial implementation of the "TFRS 16 Leases" standard, which is among the new standards, amendments and interpretations effective from 1 January 2019, in accordance with the transition obligations of the related standard.

TFRS 16 "Leases" Standard

The Bank – lessee:

At the beginning of a contract, the Bank assesses whether the contract has the quality of a lease or whether the contract includes a lease transaction. In circumstances when the contract transfers the right of controlling the asset for a certain time period for a certain price, this contract carries the quality of a lease or includes a leasing transaction. The Bank reflects the existence of a right of use and a lease liability to the financial statements at the effective date of the lease.

BURGAN BANK A.Ş.

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AS OF 31 MARCH 2026

(Amounts expressed in thousands of Turkish Lira ("TL") unless otherwise stated.)

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):

XIV. EXPLANATIONS ON LEASING TRANSACTIONS (Continued):

Existence of right-to-use:

The right to use asset is first recognized by the cost method and includes the following:

- a) The initial measurement amount of the lease obligation,
- b) The amount obtained by deducting all the rental incentives received from all lease payments made at or before the beginning of the lease;
- c) All initial direct costs incurred by the Bank.

When the Bank applies the cost method, the existence of the right to use:

- a) accumulated depreciation and accumulated impairment losses are deducted and
- b) measures the restatement of the lease obligation at the restated cost.

The Bank applies the depreciation statutes included in the TAS 16 Tangible Assets standard while depreciating the right to use an asset.

Lease obligation:

At the effective date of the lease, the Bank measures its leasing liability at the present value of the lease payments not paid at that time. Lease payments are discounted using the Bank's average borrowing interest rates in the case of this rate being easily determined. Otherwise, the Bank uses its alternative borrowing interest rates.

The lease payments included in the measurement of the lease liability consist of the payments to be made for the right of use during the lease term of the underlying asset and the unpaid payments at the effective date of the lease.

After the effective date of the lease, the Bank measures the leasing liability as follows:

- a) Increases the book value to reflect the interest on the lease obligation,
- b) Reduces the book value to reflect the lease payments made and
- c) The book value is measured to reflect reassessments and restructuring, or to reflect fixed lease payments as of revised nature.

The interest on the lease liability for each period in the lease period is the amount calculated by applying a fixed periodic interest rate to the remaining balance of the lease liability.

BURGAN BANK A.Ş.

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AS OF 31 MARCH 2026

(Amounts expressed in thousands of Turkish Lira (“TL”) unless otherwise stated.)

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):

XV. EXPLANATIONS ON PROVISIONS AND CONTINGENT COMMITMENTS:

Allocated for loans and other receivables provisions other than expected loss provisions and contingent liabilities “Provisions, Contingent Liabilities and Related to Contingent Assets, Turkey Accounting Standard (“TAS 37”) is recognized as appropriate.

Provisions are accounted for when there is a legal or constructive obligation existing as of the balance sheet date and arising from past events. It is probable that resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the liability can be made. In accordance with the 'Matching Principle', provisions are made for liabilities arising from past events in the period in which these liabilities occur. In cases where the amount cannot be reliably measured and there is no possibility of an outflow of resources from the Bank to fulfill the liability, the liability is considered 'Contingent' and disclosed in the notes.

XVI. EXPLANATIONS ON CONTINGENT ASSETS:

Contingent assets usually arise from unplanned or other unexpected events that give rise to the possibility of an inflow of economic benefits to the entity. Contingent assets are not recognised in financial statements since this may result in the recognition of income that may never be realised. Contingent assets are disclosed where an inflow of economic benefits is probable. Contingent assets are assessed continually to ensure that developments are appropriately reflected in the financial statements. If it has become virtually certain that an inflow of economic benefits will arise, the asset and the related income are recognised in the financial statements in which the change occurs.

XVII. EXPLANATIONS ON OBLIGATIONS RELATED TO EMPLOYEE RIGHTS:

The Bank accounts obligations related to employee termination and vacation rights in accordance with “Turkish Accounting Standard for Employee Rights” (“TAS 19”) and classifies these items under the “Reserve for Employee Rights” account in the balance sheet.

Under the Turkish Labour Law, the Bank is required to pay a specific amount to the employees who have retired or whose employment is terminated other than the reasons specified in the Turkish Labour Law. The reserve for employment termination benefits represents the present value of the estimated total reserve for the future probable obligation of the Bank arising from this liability.

According to the TAS 19 that is revised by Public Oversight Accounting and Auditing Standards Authority with the Communiqué published in Official Gazette on 12 March 2013 numbered 28585, in the calculation of the employment termination benefit liabilities of the Bank, the recognition option of the actuarial gains and losses derived from the changes in actuarial assumptions or the differences between actuarial assumptions and realizations in the statement of profit or loss has been eliminated which is effective for annual periods beginning on or after 1 January 2013. The earlier application of the revision is permitted in the section of the transition and effective date of the standard and therefore the Bank has recognised the actuarial gains and losses that occur in related reporting periods in the “Statement of Profit or Loss and Other Comprehensive Income” and presented in “Other Reserves” item in the Shareholders Equity section.

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):

XVIII. EXPLANATIONS ON TAXATION:

a. Current Tax:

The Corporate Tax Law No. 5520 entered into force with many of its provisions being published in the Official Gazette No. 26205 dated 21 June 2006, effective from 1 January 2006. Accordingly, in Turkey, the general Corporate Tax rate is 25% and the corporate tax rate is based on the corporate profits of banks, companies within the scope of Law No. 6361, electronic payment and money institutions, authorized foreign exchange institutions, asset management companies, capital market institutions, insurance and reinsurance companies and pension companies. The tax is calculated at a rate of 30%. The corporate tax rate is applied to the tax base found by adding expenses that are not accepted as deductions according to the tax laws to the commercial earnings of the institutions, and deducting the exceptions (such as the partnership earnings exception) and discounts included in the tax laws. If the profit is not distributed, no other tax is paid.

Corporate tax applied at the rate of 20% for corporate earnings in Turkey, pursuant to the regulation introduced by the Law No. 7316 on the "Law on the Collection of Public Claims and Amendments to Certain Laws" is applied as 25% to be applied to corporate earnings for the 2021 taxation period and 23% to be applied to corporate earnings for the 2022 taxation period, pursuant to the regulation introduced by the Law No. 7394 on "The Law on the Evaluation of Immovable Property Owned by the Treasury and Amendment to the Value Added Tax Law and Amendments to Some Laws and Decrees" this rate has been determined as 25% to be applied to the corporate earnings of banks, companies under the Law No. 6361, electronic payment and money institutions, authorized foreign exchange institutions, asset management companies, capital market institutions, insurance and reinsurance companies and pension companies for the taxation period as of 2022.

However, with the Law No. 7456 published on 15 July 2023 the aforementioned rate has been increased to 30% to be applied to cumulative bases included in declarations to be submitted as of 1 October 2023. Starting from the advance tax return to be submitted for the period of 1 January 2023 to 31 December 2023, the corporate tax rate will be applied at 30% for subsequent periods.

In Turkey, no withholding tax is applied to dividends paid to resident companies or to non-resident companies earning income through a branch or permanent representative in Turkey. While the withholding tax rate on dividends paid to individuals and entities outside these categories is 10%, it was changed to 15% by the Presidential Decree published in the Official Gazette No. 32760 on 22 December 2024. The addition of profits to capital is not considered as profit distribution, and no withholding tax is applied.

With the Presidential Decision No.7343 published in the Official Gazette dated 7 July 2023, for fully liable capital companies whose shares are traded on Borsa Istanbul, a withholding tax of 0% is applied to the amounts considered as distributed profits related to the acquisition of their own shares. This amendment will be applicable to shares acquired as of 7 July 2023. For fully liable capital companies other than those mentioned, a withholding tax rate of 15% will be applied to the amounts considered as distributed profits related to the acquisition of their own shares as of 7 July 2023.

Corporations calculate and declare provisional taxes based on their quarterly financial profits, paying them until the evening of the 17th day of the second month following the end of each period. The provisional tax paid during the year is credited against the Corporate Tax calculated on the Corporate Tax Return to be submitted for the subsequent year. Despite the offset, if there is an excess amount of provisional tax paid, this amount can be refunded in cash or offset against other financial obligations to the government.

BURGAN BANK A.Ş.

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AS OF 31 MARCH 2026

(Amounts expressed in thousands of Turkish Lira ("TL") unless otherwise stated.)

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):

XVIII. EXPLANATIONS ON TAXATION (Continued):

a. Current Tax (Continued):

While the gains arising from the sale of equity interests, founding bonds, usufruct bonds, and pre-emption rights held by institutions in their assets for at least two full years were exempt from corporate tax, provided that 75% of these gains are kept in a special fund account in liabilities until the end of the fifth year following the year of the sale and are collected by the end of the second calendar year; with the Presidential Decision published in the Official Gazette on November 27, 2024, numbered 32735, it has been determined that the exemption rate will be applied at 50%.

In accordance with the repeated Article 298 of the Tax Procedure Law, if the increase in the producer price index is more than 100% in the last 3 accounting periods including the current period and more than 10% in the current accounting period, financial statements will be subject to inflation adjustment and these conditions have been realized as of 31 December 2021. However, with the "Law on Changes to the Tax Procedure Law and Corporate Tax Law" numbered 7352 published in the Official Gazette dates 29 January 2022, and numbered 31734, temporary article 33 has been added to the Tax Procedure Law numbered 213 and the 2021 and 2022 accounting periods, including the provisional tax periods (as of the accounting periods ending in 2022 and 2023 for those who are assigned a special accounting period) the financial statements as of 31 December 2023, will be subject to inflation adjustment within the scope of article 298 are realized, and the financial statements as of 31 December 2023, will be subject to inflation adjustment regardless of whether the conditions for inflation adjustment are met, and the profit/loss differences arising from the inflation adjustment will be recognized in retained earnings.

According to Article 17 of the Law No. 7491 on Amendments to Certain Laws and Decree Laws published in the Official Gazette No. 32413 dated 28 December 2023, it has become law that profit/loss differences arising from the inflation adjustment to be made in the 2024 and 2025 accounting periods, including the provisional tax periods, do not be taken into account in determining the income of banks, companies within the scope of the Financial Leasing, Factoring, Financing and Savings Financing Companies Law No. 6361 dated 21 November 2012, payment and electronic money institutions, authorized foreign exchange institutions, asset management companies, capital market institutions, insurance and reinsurance companies and pension companies. The President of the Republic is authorized to extend the periods determined within the scope of this paragraph by one accounting period, including the temporary tax periods.

According to the Amendment Notification to the General Communiqué (Serial No: 547) on the Tax Procedure Law, published in the Official Gazette numbered 32073 dated 14 January 2023, the procedures and principles regarding the revaluation of real estate and depreciable economic assets have been revised. Accordingly, the Bank has revalued its real estate and depreciable economic assets in its balance sheet until 30 September 2023, provided that it meets the conditions specified in Temporary Article 32 of the Tax Procedure Law and Article 298/ç of the Tax Procedure Code. Since the financial statements are subject to inflation adjustment as of 31 December 2023, real estates and depreciable contingent assets are not subject to revaluation as of 31 December 2023. Due to the realization of inflation accounting conditions, no revaluation has been performed after September 30, 2023, and inflation-adjusted valuation has been applied. As a result of these transactions, corporate tax depreciation is calculated based on the current amounts adjusted for inflation in accordance with the Tax Procedure Law.

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):

XVIII. EXPLANATIONS ON TAXATION (Continued):

a. Current Tax (Continued):

Pursuant to the provisional Article 33 added to the Tax Procedure Law by Law No. 7571, published in the Official Gazette on December 25, 2025, it has been decided that financial statements shall not be subject to inflation adjustment for the 2025 fiscal year, including temporary tax periods, as well as for the 2026 and 2027 fiscal years, regardless of whether the conditions for inflation adjustment are met. Since the conditions for the 2025 inflation adjustment are considered not to have been met, revaluation in accordance with Article 298/ç of the Tax Procedure Law has become applicable to depreciable tangible assets recorded in the balance sheet. No inflation adjustment was applied as of 31 March 2026; however, revaluation has been applied to depreciable tangible assets in the financial statements as of that date in accordance with Article 298/ç of the Tax Procedure Law, and the tax effects arising from depreciation calculated on the revalued amounts have been included in the current tax calculation.

b. Deferred Tax:

The Bank calculates and accounts for deferred income taxes for all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in these financial statements in accordance with "Turkish Accounting Standard for Income Taxes" ("TAS 12") and the related decrees of the BRSA concerning income taxes.

The calculated deferred tax asset and deferred tax liability are presented as net in these financial statements.

Due to the fact that the change in the corporate tax rate that entered into force on 15 July 2023, will be taken into account in the taxation of corporate earnings for the periods valid from 1 January 2023, starting from 1 October 2023 under TAS 12, deferred tax has been calculated at the rate of 30% for assets and liabilities.

Pursuant to provisional Article 33 of the Tax Procedure Law, inflation accounting has not been applied in the financial statements as of 31 March 2026. For depreciable tangible assets, revaluation has been applied in accordance with Article 298/ç of the Tax Procedure Law, and the tax effects arising from depreciation calculated on the revalued amounts have been included in the deferred tax calculation.

c. Transfer Pricing:

Under the Article 13 of the Corporate Tax Law, titled "Hidden Profit Distribution through Transfer Pricing," the subject of transfer pricing is addressed, and the "General Communiqué on Hidden Profit Distribution through Transfer Pricing," published on 18 November 2007, specifies the details of its implementation.

According to the relevant Communiqué, if tax payers engage in the purchase and sale of goods, services, or products with related entities (individuals) and these transactions are not conducted in line with the arm's length principle, it will be concluded that the related profits have been secretly distributed through transfer pricing. Such hidden profit distributions through transfer pricing cannot be deducted from the tax base for corporate tax purposes.

As stipulated in the General Communiqué No. 4 on Hidden Profit Distribution through Transfer Pricing, corporate tax payers are required to fill out the "Transfer Pricing, Controlled Foreign Corporation and Hidden Capital Form" for any purchases or sales of goods or services made with related parties during an accounting period and submit it, along with the corporate tax return, to the relevant tax office.

BURGAN BANK A.Ş.

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AS OF 31 MARCH 2026

(Amounts expressed in thousands of Turkish Lira (“TL”) unless otherwise stated.)

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):

XIX. ADDITIONAL EXPLANATIONS ON BORROWINGS:

The Bank fund resources in essence consist of borrowing from foreign financial institutions, issued securities and money market debt.

Financial liabilities and derivative transactions are valued with their fair values and other financial liabilities are carried at “amortized cost” using the effective interest method in the following periods.

The Bank utilizes various hedging techniques to minimize the currency, interest rate and liquidity risks of its financial liabilities. No convertible bonds have been issued by the Bank.

XX. EXPLANATIONS ON ISSUANCE OF SHARE CERTIFICATES:

Transaction costs regarding the issuance of share certificates are accounted under shareholders’ equity after eliminating the tax effects.

XXI. EXPLANATIONS ON AVALIZED DRAFTS AND ACCEPTANCES:

Avalized drafts and acceptances shown as liabilities against assets are included in the “Off-balance sheet commitments”.

XXII. EXPLANATIONS ON GOVERNMENT GRANTS:

As of 31 March 2026, the Bank does not have any government grants or aids (31 December 2025: None).

XXIII. EXPLANATIONS ON PROFIT RESERVES AND PROFIT DISTRIBUTION:

Retained earnings as per the statutory financial statements other than legal reserves are available for distribution, subject to the legal reserve requirement referred to below.

Under the Turkish Commercial Code (“TCC”) the legal reserves are composed of first and second reserves. The TCC requires first reserves to be 5% of the profit until the total reserve is equal to 20% of issued and fully paid-in share capital. Second reserves are required to be 10% of all cash profit distributions that are in excess of 5% of the issued and fully paid-in share capital. However holding companies are exempt from this application. According to the Turkish Commercial Code, legal reserves can only be used to compensate accumulated losses and cannot be used for other purposes unless they exceed 50% of paid-in capital.

BURGAN BANK A.Ş.**NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AS OF 31 MARCH 2026**

(Amounts expressed in thousands of Turkish Lira ("TL") unless otherwise stated.)

EXPLANATIONS ON ACCOUNTING POLICIES FOR THE RELEVANT PERIOD (Continued):**XXIV. EXPLANATIONS ON EARNINGS PER SHARE:**

Earnings per share disclosed in the income statement are calculated by dividing net profit/(loss) for the year to the weighted average number of shares outstanding during the period concerned.

	31 March 2026	31 March 2025
Net Income/(Loss) to be Appropriated to Ordinary Shareholders	500,231	552,874
Weighted Average Number of Issued Ordinary Shares (Thousand)	305,000,000	305,000,000
Earnings/(Losses) Per Ordinary Shares (Disclosed as 1,000 nominal in full TL)(*)	1.640	1.813

Based on the Article of Association, the Bank has 1,000,000 founder's shares. According to the Article of Association, after allocating 5% to legal reserves and allocating a first dividend amounting to distributing 5% of the paid in capital, 10% of distributable amount is distributed to the owners of the founder's shares.

In Turkey, companies can increase their share capital by making a pro-rata distribution of "Bonus shares" to existing shareholders from retained earnings. For the purpose of earnings per share computations, the weighted average number of shares outstanding during the year has been adjusted in respect of "Bonus shares" issued without a corresponding change in resources by giving them a retroactive effect for the year in which they were issued and for each earlier period. In case bonus shares are distributed after the balance sheet date but before the preparation of the financial statements, earnings per share is calculated considering the new number of shares.

XXV. EXPLANATIONS ON RELATED PARTIES:

Parties defined in Article 49 of the Banking Law No.5411, Bank's senior management and Board Members are deemed as related parties within the scope of "TAS 24". Transactions regarding related parties are presented in Note V. of Section Five.

XXVI. EXPLANATIONS ON CASH AND CASH EQUIVALENTS:

For the purposes of the cash flow statement, "Cash" includes cash effectives, cash in transit, purchased cheques and demand deposits including balances with the Central Bank; and "Cash Equivalents" include interbank money market placements, time deposits at banks with original maturity periods of less than three months and investments on marketable securities other than common stocks.

XXVII. EXPLANATIONS ON SEGMENT REPORTING:

Operational field is distinguishable section of the Bank that has different characteristics from other operational fields per earning and conducts the presentation of service group, associated bank products or a unique product. Operating segments are disclosed in Note X. in Section Four.

XXVIII. DISCLOSURES ON OTHER MATTERS:

The Bank's non-consolidated financial statements for the current period are prepared on a comparative basis with the prior period. Comparative information may be reclassified, where necessary, to ensure consistency with the presentation of the current period's non-consolidated financial statements.

None.

SECTION FOUR

INFORMATION RELATED TO THE FINANCIAL STRUCTURE AND RISK MANAGEMENT OF THE BANK

I. EXPLANATIONS ON EQUITY:

Total capital and Capital adequacy ratio have been calculated in accordance with the "Regulation on Equity of Banks" and "Regulation on Measurement and Assessment of Capital Adequacy of Banks". As of 31 March 2026, the Bank's total capital has been calculated as TL 21,019,777 (31 December 2025: TL 20,941,180) and the capital adequacy ratio is 14.03% (31 December 2025: 18.11%).

As of 31 March 2026, within the scope of BRSA's instructions dated 21 December 2021 and 28 April 2022 and 31 January 2023 and 19 December 2024; in the calculation of the amount subject to credit risk, in accordance with the Regulation on Measurement and Evaluation of Capital Adequacy of Banks (Capital Adequacy Regulation) published in the Official Gazette dated 23 October 2015 and numbered 29511; when calculating the amounts of monetary assets and non-monetary assets other than items in foreign currency measured at historical cost, valued in accordance with Accounting Standards and related special provisions, Central Bank's foreign exchange buying rates as of 28 June 2024 was used and in case the net valuation differences of the securities held by the Bank in the portfolio of "Securities at Fair Value Reflected in Other Comprehensive Income" as of 1 January 2024, decision date are negative, it is possible to ignore these differences in the amount of equity to be calculated in accordance with the Regulation on the Equity of Banks published in the Official Gazette dated 5 September 2013 and numbered 28756 and to be used for the capital adequacy ratio. As per the decision of the BRSA dated November 13, 2025 and numbered 11286, the implementation of the instructions explained above has been discontinued as of January 1, 2026.

BURGAN BANK A.Ş.

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AS OF 31 MARCH 2026

(Amounts expressed in thousands of Turkish Lira (“TL”) unless otherwise stated.)

**INFORMATION RELATED TO FINANCIAL STRUCTURE AND RISK MANAGEMENT OF THE BANK
(Continued):**

I. EXPLANATIONS ON EQUITY (Continued):

b. Explanations on the reconciliation of equity items with balance sheet amounts:

The difference between Total Capital and Shareholders’ Equity in the unconsolidated balance sheet mainly arises from expected credit loss provisions (for stage I and stage II loans) and subordinated loans.

As stated in Article 8 of the Regulation on Equities of Banks, up to 1.25% of the amount constituting the basis for credit risk of the First and Second Stage Losses Provisions and 100% of the remaining maturity of the subordinate loans over the nominal amount until they fall below 5 years, and the remaining portion by decreasing by 20% for each year less than 5 years, are considered as the “Supplementary Capital” item in the equity calculation constituting the basis for capital adequacy. In addition; In accordance with the Regulation, the operating lease development costs and Intangible Fixed Assets balances monitored under the Tangible Fixed Assets item in the balance sheet are considered as a deduction item from core capital in the equity calculation constituting the basis for capital adequacy calculation.

INFORMATION RELATED TO FINANCIAL POSITION AND RISK MANAGEMENT OF THE BANK(Continued):**II. EXPLANATIONS ON RISK MANAGEMENT (Continued):****a. Overview of Risk-Weighted Amounts**

Notes and explanations in this section have been prepared in accordance with the Communiqué on Disclosures about Risk Management to Be Announced to Public by Banks that have been published in Official Gazette No. 29511 on 23 October 2015 and became effective as of 31 March 2016. The following tables, which must be submitted quarterly in accordance with the relevant communiqué, were not presented on 31 March 2026 since the standard approach was used in the Bank's capital adequacy calculation,

- RWA flow statements of credit risk exposures under IRB
- RWA flow statements of CCR exposures under the Internal Model Method (IMM)
- RWA flow statements of market risk exposures under an IMA

		Risk Weighted Amounts		Minimum
		Current Period	Prior Period	Capital Liability
		31 March 2026	31 December 2025	Current Period
		31 March 2026	31 March 2026

BURGAN BANK A.Ş.**NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AS OF 31 MARCH 2026**

(Amounts expressed in thousands of Turkish Lira (“TL”) unless otherwise stated.)

**INFORMATION RELATED TO FINANCIAL POSITION AND RISK MANAGEMENT OF THE BANK
(Continued):****III. EXPLANATIONS ON CURRENCY RISK:**

The difference between the Bank’s foreign currency denominated and foreign currency indexed on- and off-balance sheet assets and liabilities is defined as the “Net Foreign Currency Position” and it is the basis of currency risk. Another important dimension of the currency risk is the change in the exchange rates of different foreign currencies in Net Foreign Currency Position (cross currency risk).

A series of limits for the tenure of spot and forward foreign exchange positions are set by the Board of Directors annually. The Bank has a short-term conservative foreign currency position management policy.

The Bank’s publicly announced foreign exchange bid rates as of the date of the financial statements and for the last five days prior to that date:

	EUR		USD	
	31 March 2026	31 December 2025	31 March 2026	31 December 2025
Currency Buying Rate	TL 50.9294	TL 50.2859	TL 44.3961	TL 42.8457
1st Day’s Currency Buying Rate	TL 50.9294	TL 50.2859	TL 44.3961	TL 42.8457
2nd Day’s Currency Buying Rate	TL 51.0236	TL 50.4532	TL 44.3841	TL 42.8623
3rd Day’s Currency Buying Rate	TL 51.0150	TL 50.4519	TL 44.2887	TL 42.8542
4th Day’s Currency Buying Rate	TL 51.1617	TL 50.3547	TL 44.2828	TL 42.7656
5th Day’s Currency Buying Rate	TL 51.3620	TL 50.3896	TL 44.2737	TL 42.7641

The simple arithmetic average of the Bank’s foreign exchange bid rates for the last thirty days preceding the balance sheet date for major foreign currencies are shown below:

	EUR		USD	
	31 March 2026	31 December 2025	31 March 2026	31 December 2025
30-day arithmetic average	TL 50.9386	TL 49.9225	TL 44.0991	TL 42.6061

**INFORMATION RELATED TO FINANCIAL STRUCTURE AND RISK MANAGEMENT OF THE BANK
(Continued):****IV. EXPLANATIONS ON INTEREST RATE RISK:**

Interest rate risk is the risk that expresses the effects of fluctuations in the market interest rates on the value increase/decrease of the Bank's interest rate sensitive assets and liabilities. The interest sensitivity of risks regarding the interest rate both on the on-balance sheet and off-balance sheet are monitored following several analyses and are discussed in Asset and Liability Committee weekly.

The Bank closely monitors the maturity gap between liabilities and assets that may arise in the balance sheet to manage the interest rate risk better. Additionally, interest rate swaps and cross currency swaps that are followed under banking accounts and aim to hedge risks are conducted by the Treasury, Capital Markets and Financial Institutions Group. Liquidity management is critical in the combination of investments, securities which fair value difference reflected in other comprehensive income and the trading portfolio. Through using these precautions, the possible loss effects on the shareholders' equity due to both credit risk and interest risk during the volatile periods of the market are minimized.

**INFORMATION RELATED TO FINANCIAL STRUCTURE AND RISK MANAGEMENT OF THE BANK
(Continued):****IV. EXPLANATIONS ON INTEREST RATE RISK (Continued):****c. Interest rate risk resulting from banking accounts:**

1. The nature of the interest rate risk arising from banking accounts and the measurement frequency of such risk, including significant assumptions relating to early repayments of fixed-rate loans, early withdrawals of time deposits and non-maturity core deposits, are as follows:
 - Interest rate risk resulting from the banking accounts is measured according to the month-end balance in accordance with “Regulation on the Measurement and Evaluation of Interest Rate Risk Arising from Banking Accounts under the Standardised Approach, published in the Official Gazette dated 12 May 2025 and numbered 32898”
 - Interest sensitive items are taken into consideration in accordance with the re-pricing period and depending on the estimated cash flows. Demand deposits are taken into account based on the core deposit calculations. The change calculated by implementing interest rate shocks on the differences created in accordance with the re-pricing periods of the assets and liabilities in the banking accounts is proportioned to the core capital. The table presents the results of parallel upward and parallel downward shocks.
2. The differences in the Bank’s economic value arising from fluctuations in interest rates, in accordance with the “Regulation on the Measurement and Evaluation of Interest Rate Risk Arising from Banking Accounts under the Standard Shock Method”, broken down by currency, are presented in the table below. In the calculations, items denominated in Euro and Japanese Yen are presented under the Euro heading.

	Applied Shock (+/- x basis point)	Earnings/ Losses	Earnings/ Equities-Losses/ Equities
1. TL	+500 bp	(407,031)	(2.8%)
2. TL	-400 bp	391,769	2.7%
3. EUR	+200 bp	(483,911)	(3.3%)
4. EUR	-200 bp	539,902	3.7%
5. USD	+200 bp	(888,104)	(6.0%)
6. USD	-200 bp	1,100,772	7.5%
Total (For Negative Shocks)		2,032,444	13.9%
Total (For Positive Shocks)		(1,779,046)	(12.1%)

V. EXPLANATIONS ON SHARE CERTIFICATE POSITION RISK:

None.

INFORMATION RELATED TO FINANCIAL STRUCTURE AND RISK MANAGEMENT OF THE BANK (Continued):

VI. EXPLANATIONS ON LIQUIDITY RISK MANAGEMENT AND LIQUIDITY COVERAGE RATIO:

Liquidity risk is the risk generated as a result of not having an effect or cash inflow at a level which can meet cash outflow, formed because of an imbalance in cash flow, timely and completely.

Effective liquidity risk management requires assigning appropriate staff for measurement and monitoring and timely informing management of the Bank. Board of Directors and senior management is responsible to understand the nature and level of the liquidity risk taken by the Bank and the instruments measuring these risks. Additionally, Board of Directors and Senior Management are responsible for the compliance of funding strategies to risk tolerance which is determined to be applied.

Liquidity risk management framework of the Bank is determined with “Burgan Bank Risk Management Policy” and “Burgan Bank Liquidity Risk Policy” documents approved by Bank’s Board of Directors and “Burgan Bank Risk Management Policy” and “Burgan Bank Treasury Policy” and “Burgan Bank Assets & Liabilities Management Committee (ALCO)” in scope of banking legislation.

Liquidity management is primarily under the responsibility of ALCO in accordance with the Liquidity Risk Management of the Bank. Treasury, Capital Markets and Financial Corporations Group are responsible to perform required actions in accordance with the liquidity standards determined in accordance with the Liquidity Risk Policy. Market Risk Departments is secondarily responsible and it is responsible to control and report compliance with the limits. Periodic and specific reports on liquidity risk, stress tests, scenario analyses, risk limits compliance reports and detailed information on legal liquidity reports (frequency of reports and the bodies they are submitted to) are included in the Bank's Liquidity Risk Policy.

Liquidity risk exposed by the Bank, risk appetite, liquidity risk reduction appropriate to liquidity and funding policies (diversification of funding sources and maturities, derivative transactions), establishment of effective control environment, risk limits, early warning and triggering market indicators are managed through monitoring closely.

The liquidity risk is removed by short term placements, liquid marketable assets wallet and strong equity structure in the management of liquidity risk. Board of Directors of Bank can perform limit reduction regardless of credit value in current placement limits when the volatility in markets increases. Management of the Bank and ALCO monitors possible marginal costs of payments and spurts as a result of studies made in scope of scenario analysis while tracking interest margin in diversified maturity segments between assets and liabilities. Borrowing limits which can be used in short-term for spurts from Central Bank, BIST Repo Market, Takasbank Money Market and banks are applied at a minimum level. The Bank does not need to use these sources because of its current liquidity position but it uses the aforementioned limits for short-term transaction opportunities. Assets, liabilities and positions on the basis of main tfees of currencies (currencies forming at least 5% of Bank’s total liabilities) are managed under the control of Treasury and Capital Markets.

INFORMATION RELATED TO FINANCIAL STRUCTURE AND RISK MANAGEMENT OF THE BANK (Continued):

VI. EXPLANATIONS ON LIQUIDITY RISK MANAGEMENT AND LIQUIDITY COVERAGE RATIO (Continued):

Although the Bank is responsible to comply with liquidity limitations which are determined in Liquidity Risk Policy, it is primarily obliged with minimum liquidity limits determined by the legal legislation. There should be no excess in liquidity limits in accordance with the Bank's policy. Acceptation of current risk level, reduction or termination of activities causing to risk are evaluated for the risk which are not reduced. The actions, which shall be taken if there is an excess in the legal and internal limits, are detailed in Liquidity Risk Policy of the Bank. Overflow which is formed in liquidity ratios tracked according to legal limitations is eliminated in the period which is also determined by legal legislation.

Triggering market indicators are indicators which are tracked as early warning signals before the transition to stress environment which can form in the market as a result of ordinary business condition. Early warning limits related to liquidity risk in Bank are determined and aforementioned limits are monitored closely with the triggering market indicators.

Market Risk Department reports results of scenarios related to liquidity risk to Board of Directors, Risk Coordination Committee, Risk Committee and ALCO through making monthly calculations based on stress scenarios. These stress tests identify negative market conditions and potential fund outflows which occur in funding resources in a liquidity crisis. The purpose of stress test is to inform related committees and Board of Directors regarding liquidity outflows and derogation which can occur in the liquidity ratios of the Bank. Required actions are taken by ALCO if there are similar situations mentioned in stress scenarios. Market Risk Unit conducts stress tests more frequently during periods of high volatility and shares the results with the relevant management.

The Bank does not serve a function as a central funding institution in its relationship with its partnerships. Intra-group liquidity management and funding strategies are limited to related legal limitations.

BURGAN BANK A.Ş.**NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AS OF 31 MARCH 2026**

(Amounts expressed in thousands of Turkish Lira (“TL”) unless otherwise stated.)

**INFORMATION RELATED TO FINANCIAL STRUCTURE AND RISK MANAGEMENT OF THE BANK
(Continued):****VI. EXPLANATIONS ON LIQUIDITY RISK MANAGEMENT AND LIQUIDITY COVERAGE
RATIO (Continued):**

Liquidity coverage rate is calculated through estimating high quality liquid assets owned by the Bank to net cash out flows based on 30 days of maturity. Balance items which are determinant on the ratio are sorted as required reserves kept in Central Bank of Turkey, securities which are not subject to repo/guarantee, deposit having a corporate transaction, banks deposits, foreign sourced funds and receivables from banks. The impacts of aforementioned items on liquidity coverage ratio are higher than other items since they have a higher share in liquid assets and net cash out flows and they can change in time.

High quality liquid assets of the Bank consist of accounts in Central Bank of Turkey, at a ratio of 65% and securities issued by Undersecretariat of Treasury at a ratio of 31%. The fund resources are distributed among deposits of individuals and retail, corporate deposits and due to banks at ratios of 9%, 61% and 18% respectively.

Fluctuations in foreign currency derivative transaction volumes, mainly in foreign currency swaps, can have an impact on foreign currency liquidity coverage rate although derivative transactions generate a lower level of net cash flow with respect to liquidity coverage rate.

Absolute value of net warrant flows realized as of 30 days periods for each transaction and liability are calculated provided that changes in fair values of derivative transactions and other liabilities can form a margin liability in accordance with “Regulation on Calculation of Liquidity Coverage Ratio of Banks” entered into force through publishing in Official Gazette dated 21 March 2014 and numbered 28948. The biggest absolute value, which is calculated in the last 24 months, is taken into consideration as cash outflow. Calculations for derivative transactions and other liabilities, having a flow history shorter than 24 months, are performed from the date in which the transaction is triggered. Information related to the aforementioned cash outflow occurred on 31 March 2026 is given below:

Date	FC	FC+TL
31 March 2026	135,192	135,192

Liquidity coverage rates are calculated weekly for unconsolidated basis and monthly for consolidated basis as of 31 December 2015 in accordance with the “Regulation on Calculation of Liquidity Coverage Ratio of Banks” published in Official Gazette dated 21 March 2014 and numbered 28948. Liquidity coverage rates must be at least 80% for foreign currency assets and liabilities and at least 100% in total assets and liabilities. Dates and values of lowest and highest foreign currency and total unconsolidated liquidity coverage rates calculated weekly related to the last quarter and average rates are explained in the table below:

Current Period	Maximum (%)		Minimum (%)	
	FC	FC+TL	FC	FC+TL
Weekly Arithmetic Average (%)	386,48	240,23	164,67	138,72
Week	6.03.2026	9.01.2026	13.02.2026	20.02.2026

**INFORMATION RELATED TO FINANCIAL POSITION AND RISK MANAGEMENT OF THE BANK
(Continued):****VI. EXPLANATIONS ON LIQUIDITY RISK MANAGEMENT AND LIQUIDITY COVERAGE
RATIO (Continued):****Net Stable Funding Ratio:**

Net stable funding ratio (NSFR) is calculated by dividing the available stable funding amount by the required stable funding amount. Available stable funding includes the portion of banks' liabilities and capital that are expected to be permanent; and required stable funding refers to the portion of banks' onbalance sheet assets and off-balance sheet liabilities that are expected to be refunded.

Available stable funding amount is calculated by summing the amounts to be found after applying the relevant consideration rates determined within the scope of the legislation to the amounts of banks' liabilities and capital items valued in accordance with TFRS. Required stable funding amount will be found after applying the relevant consideration rates determined within the scope of the legislation to the value calculated by deducting the special provisions set aside in accordance with the Regulation on the Procedures and Principles on the Classification of Loans and the Provisions from the amounts of the banks' on-balance sheet assets and off-balance sheet liabilities valued in accordance with TFRS.

The three-month simple arithmetic average of the consolidated and unconsolidated NSFR calculated monthly as of capital calculation periods as of March, June, September and December cannot be less than one hundred percent.

(Amounts expressed in thousands of Turkish Lira ("TL") unless otherwise stated.)

**INFORMATION RELATED TO FINANCIAL POSITION AND RISK MANAGEMENT OF THE BANK
(Continued):****VII. EXPLANATIONS ON LEVERAGE RATIO:****Information on subjects that causes difference in leverage ratio between current and prior periods:**

As of 31 March 2026, leverage ratio of the Bank calculated from the arithmetic average of the three months is 6.31% (31 December 2025: 6.92%). This ratio is above the minimum required. The most important reason for the difference in leverage ratio between current and prior period is the increase in balance sheet and off-balance sheet assets.

Disclosure of leverage ratio template:

	31 March 2026 (*)	31 December 2025 (*)
Balance sheet assets		
Balance sheet assets (excluding derivative financial assets and credit derivatives, including collaterals)	182,758,950	159,040,251
(Assets deducted from Core capital)	547,274	516,835
Total risk amount of balance sheet assets	182,211,676	158,523,416
Derivative financial assets and credit derivatives		
Cost of replenishment for derivative financial assets and credit derivatives	1,804,767	5,352,739
Potential credit risk amount of derivative financial assets and credit derivatives	1,885,518	1,081,510
Total risk amount of derivative financial assets and credit derivatives	3,690,285	6,434,249
Financing transactions secured by marketable security or commodity		
Risk amount of financing transactions secured by marketable security or commodity (excluding Balance sheet)	-	-
Risk amount arising from intermediary transactions	-	-
Total risk amount of financing transactions secured by marketable security or commodity	-	-

(*) The arithmetic average of the last 3 months in the related periods.

BURGAN BANK A.Ş.**NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AS OF 31 MARCH 2026**

(Amounts expressed in thousands of Turkish Lira (“TL”) unless otherwise stated.)

**INFORMATION RELATED TO FINANCIAL STRUCTURE AND RISK MANAGEMENT OF THE BANK
(Continued):****VIII. EXPLANATIONS ON HEDGE TRANSACTIONS:**

The Bank applies cash flow hedge accounting through cross currency swaps and interest rate swaps to hedge against changes in the interest rates of deposits with an average maturity of up to three months as of 31 March 2026, performs effectiveness tests for hedge accounting at each reporting date, recognizes the effective portion under equity in the “Hedging Reserves” account as defined in TFRS 9, and recognizes the ineffective portion in profit or loss.

As of the balance sheet date derivative financial assets of which carrying amount is TL 1,521,495 (31 December 2025: TL 1,054,514) and derivative financial payables of which carrying amount is TL 648,217 (31 December 2025: TL 1,067,756), are subject to hedge accounting as hedging instruments. As a result of the mentioned hedge accounting, accumulated other comprehensive income (loss) reclassifiable to profit or loss expense amounting to TL 637,252 (31 December 2025: TL 216,879 accumulated other comprehensive income (loss) reclassifiable to profit or loss expense) after tax is recognized under the equity in the current period. The amount which is ineffective or transferred from equity to the income statement due to closed swaps is TL 1,780 (31 December 2025: TL 9,115).

Hedging Instrument	Hedging Subject	Exposed Risk	Hedging Instruments Fair Value		Hedging Funds (*)	Ineffective Part Accounted in the Statement of Profit or Loss(Net)
			Assets	Liabilities		
Cross Currency Swap	Floating rate up to 3 month maturity deposits	Cash flow risk of changes in market interest rates	106,955	100,273	12,470	-
Interest Rate Swap	Floating rate up to 3 month maturity deposits	Cash flow risk of changes in market interest rates	1,414,540	547,944	569,201	-

(*) Includes TAS 27 impacts and describes after tax amounts.

When hedge accounting of cash flow hedges cannot be maintained effectively as defined in TAS 39, the accounting application is ended. In case of deterioration of efficiency, the effective amounts, which are recognized under the equity due to the risk hedge accounting, are eliminated from equities in the periods or periods, when cash flow effects profit and losses (periods, when interest income or expenses are recognized) as re-classification adjustment and then it is re-classified in the profit and loss. The amount which is ineffective or transferred from equity to the income statement due to closed swaps is TL 1,780. (31 December 2025: TL 9,115).

IX. EXPLANATIONS REGARDING SERVICES PROVIDED ON BEHALF OF OTHERS:

The bank engages in securities trading and custodial activities on behalf of real and legal persons. The details of the securities held in custody are presented in the Off-Balance Sheet Liabilities table.

Time Restricted Amount	-	11,451,856	-	4,026,365
Total	8,819,365	19,278,505	5,839,030	10,234,016

3. Information on reserve requirements:

The bank establishes mandatory reserves with the Central Bank of the Republic of Turkey (CBRT) for Turkish lira and foreign currency liabilities according to the CBRT's "Communiqué on Reserve Requirements No. 2013/15." Mandatory reserves can be held at the CBRT in TL, USD, EUR, and standard gold as per the "Communiqué on Reserve Requirements."

As of 31 March 2026, the applicable rates for mandatory reserves held at the CBRT are between 3% and 20% for TL, depending on the maturity structure, excluding accounts for which the Central Bank provides exchange rate/price protection (31 December 2025: between 3% and 18%); for accounts with exchange rate/price protection provided by the Central Bank, the range is between 22% and 40% (31 December 2025: between 22% and 40%). For foreign currency, the rates range between 0% and 30% depending on the maturity structure of foreign currency deposits (31 December 2025: between 5% and 32%). Additionally, a mandatory reserve of 2.5% in TL is required for foreign currency deposits.

BURGAN BANK A.Ş.

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AS OF 31 MARCH 2026

(Amounts expressed in thousands of Turkish Lira ("TL") unless otherwise stated.)

EXPLANATIONS AND NOTES RELATED TO UNCONSOLIDATED FINANCIAL STATEMENTS (Continued):

I. EXPLANATIONS AND NOTES RELATED TO ASSETS (Continued):

e. Explanations on loans (Continued):

10. Policy followed-up for the collection of uncollectible loans and other receivables:

The Bank aims to collect uncollectible loans and other receivables are collected through the liquidation of collaterals by legal procedures.

11. Explanations of the write-off policy:

Within the scope of the amendment to the Banking Act, the Regulation on the Classification of Loans and the Procedures and Principles for the provisions to be allocated for them were also amended;

- Classified under Fifth Group-Uncollectible Loans,
- Part of the borrower's default for the lifetime expected credit losses or if there are no reasonable expectations for the recover of loans allocated in specific provision,
- From the first reporting period (interim or year-end reporting period) following their classification in the group,

It has been allowed to be written-off from the accounts under TFRS 9.

Accordingly, non-performing loans are tracked in off-balance sheet accounts by writing-off the records. This transaction is an accounting application that allows the transfer of the legal proceeding balance to the off-balance sheet by removing it from asset accounts and not the result of the Bank giving up the right to credit.

It is not compulsory that the entire receivable for collecting from registration has no possibility to collect, but it is possible to remove the part that does not have partial collection possibility from the assets.

In order to write-off any legal proceedings from the account;

- Classified under Fifth Group (Uncollectible Loans),
- 100% provision for the portion of the account balance that will be written-off,
- Either the legal proceedings to be continued or to be started,

must be met.

Provisions allocated for amounts written-off from the accounts are considered "expense" in terms of tax legislation. The write-off process is only an accounting process and will continue the legal proceedings for the collection of the Bank's receivables. After the writing-off process, the balance in the off-balance sheet accounts will be collected for the part of the debt that is written-off from the account in full or part of the collection by agreeing with the borrower and the debtor's request.

As of 31 March 2026, the Bank does not have any written-off receivables (31 December 2025: TL 7).

Total	617,075	31,142	1,028,811	38,945

h. Information on provisions:

1. Information on reserve for employment termination benefits:

Under the Turkish Labor Law, the Bank is required to pay a specific amount to the employees who have been working more than one year, when employment is terminated due to obligatory reasons or they retire, when they have fulfilled 25 working years (women 20) and are eligible for retirement (for women 58 years, for men 60 years), when they have been called up for military service or when they die. After the amendment of legislation on 23 May 2002, some of the transition process articles related to the working period before retirement were enacted.

The compensation to be paid is equivalent to one month's salary for each year of service, and this amount is capped by the severance pay ceiling. Severance pay obligation is not legally subject to any funding, and there are no funding requirements.

BURGAN BANK A.Ş.**NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AS OF 31 MARCH 2026**

(Amounts expressed in thousands of Turkish Lira ("TL") unless otherwise stated.)

**EXPLANATIONS AND NOTES RELATED TO UNCONSOLIDATED FINANCIAL STATEMENTS
(Continued):****II. EXPLANATIONS AND NOTES RELATED TO LIABILITIES (Continued):****h. Information on provisions (Continued):**

1. Information on reserve for employment termination benefits (Continued):

The reserve has been calculated by estimating the present value of the future probable obligation of the Bank arising from the retirement of its employees. TAS 19 necessitates the actuarial valuation methods to calculate liabilities of enterprises. Independent actuaries are used in determining the liability of the Bank. There are assumptions in the calculation as discount rate, employee turnover and expected salary increases. In this context, the following actuarial assumptions are used in the calculation of total liabilities.

	31 March 2026	31 December 2025
Discount Rate (%)	4.00	4.00
Salary Increase Rate (%)	25.22	25.22
Average Remaining Work Period (Year)	15.66	15.66

Movement of reserve for employment termination benefits during the period:

	31 March 2026	31 December 2025
Prior period balance	109,487	91,681
Current service cost	5,364	19,116
Interest cost	7,650	24,564
Settlement cost	-	-
Actuarial loss/gain	-	(15,021)
Benefits paid (-)	625	10,853
Balance at the End of the Period	121,876	109,487

In addition, as of 31 March 2026, the Bank has accounted for vacation rights provision and personnel bonus provision amounting to TL 107,258 (31 December 2025: TL 445,088).

2. Other Provisions:

i. Information on provisions related with foreign currency difference of foreign indexed loans:

The provisions related to foreign currency differences of foreign indexed loans calculated as of the balance sheet date have been netted-off from the loan amount in the financial statements, and there is no the provision related to foreign currency differences of foreign indexed loans (31 December 2025: None).

ii. Information on other provisions:

The Bank set aside free provisions under other provisions amounting to TL 234,183 (31 December 2025: TL 20,000) for free provision, TL 49,521,721 (31 December 2025: TL 43,721) for provisions for non-cash loans and commitments that are not converted to cash and not indemnified and lawsuit provisions amounting to TL 12,745 (31 December 2025: TL 14,231) and other provisions amounting to and TL 10,968 (31 December 2025: TL 10,655).

II. EXPLANATIONS AND NOTES PREPARED BY INDEPENDENT AUDITOR

None.

SECTION SEVEN**EXPLANATIONS ON THE INTERIM MANAGEMENT REPORT****I. CHAIRMAN'S AND CHIEF EXECUTIVE OFFICER'S ASSESSMENTS OF THE OPERATING PERIOD AND OUTLOOK FOR THE FUTURE**

During the first quarter of the year, global economic developments were shaped by legal and political uncertainties regarding the tariff policies implemented by the United States, as well as energy price shocks resulting from the Iran–U.S.–Israel conflict that erupted in the Middle East. The U.S. Supreme Court ruled that the International Emergency Economic Powers Act does not grant the President the authority to impose tariffs. Following this decision, President Trump introduced a temporary global tariff of 10% for a period of 150 days. The legal turmoil surrounding tariff policy continued to increase uncertainty regarding U.S. trade policy. The Federal Reserve kept the policy rate unchanged within the range of 3.50%–3.75% in the first quarter. Monetary policymakers have been attempting to balance, on the one hand, elevated inflation driven by tariff policies and rising energy prices, and on the other hand, the slowdown in the labor market. Consumer price index data for March indicated that headline inflation rose to 3.3% on an annual basis, reaching its highest level since May 2024. The primary driver of this increase was energy costs. The growth and inflation projections published by the IMF also point to higher inflation for the U.S. economy, while not anticipating a significant slowdown in economic activity.

Looking at the Turkish economy, GDP grew by 3.4% on an annual basis in the fourth quarter of 2025; this figure remained below the revised rate of 3.8% in the previous quarter and came in below market expectations. For the full year, GDP growth in 2025 was realized at 3.6%. While fourth-quarter growth was mainly supported by private consumption, net exports made a negative contribution to growth. This indicates that growth driven by domestic demand has continued. Leading indicators for the first quarter — including PMI, capacity utilization, and both consumer and real sector confidence indices — point to a moderate slowdown in growth

The war in the Middle East is expected to adversely affect growth through both exports and tourism revenues. In this context, growth expectations for 2026 have been revised down from around 4% to approximately 3%. As a result of developments in the Middle East, the CBRT's gross reserves declined from USD 186 billion at the beginning of the year to USD 153 billion in the first quarter. Net reserves decreased from USD 53 billion to USD 18.3 billion. The CDS level increased from 204 at the end of 2025 to 304 by the end of March.

On the monetary policy front, the CBRT reduced the policy rate by 100 basis points to 37% at its January 2026 meeting; this cut remained below the median market expectation of 150 basis points. At the March 2026 meeting, however, the CBRT kept the policy rate unchanged for the first time following five consecutive rate cuts, due to the upward pressure of the conflict in the Middle East on energy prices and its adverse impact on the inflation outlook. On the other hand, the CBRT suspended its weekly repo auctions and has been conducting funding through the overnight repo rate of 40%. This has led to an increase in market interest rates. The emergence of a Turkish lira liquidity deficit in the market, driven by the CBRT's foreign exchange sales, has forced banks to apply more competitive pricing in attracting TL deposits. As a result, commercial and retail borrowing costs increased by more than 300 basis points in the first quarter. Looking ahead, domestic interest rates will be determined depending on the impact of energy prices on inflation.

In this challenging environment, we continue to manage our balance sheet effectively and successfully in line with our dynamic and agile management approach; we deliver the highest service standards to our customers across all their needs and resolutely implement our strategic investments in digital banking.

BURGAN BANK A.Ş.

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS AS OF 31 MARCH 2026

(Amounts expressed in thousands of Turkish Lira ("TL") unless otherwise stated.)

EXPLANATIONS ON THE INTERIM MANAGEMENT REPORT (Continued):

I. CHAIRMAN'S AND CHIEF EXECUTIVE OFFICER'S ASSESSMENTS OF THE OPERATING PERIOD AND OUTLOOK FOR THE FUTURE (Continued):

As of 31 March 2026, our Bank's consolidated total assets amounted to TL 207,478,870, while the total of consolidated net cash loans and finance lease receivables stood at TL 115,293,811, and total deposits reached TL 77,177,827. Our Bank recorded a net profit of TL 500,231 for the first quarter of 2026, while our shareholders' equity increased to TL 13,630,830. Our consolidated capital adequacy ratio was realized at 12.97%.

Going forward, we will maintain our focus on digitalization; continue to enhance our investments, innovative product portfolio, and digital processes, and deliver superior service to our customers while providing uninterrupted support for their needs. In line with the strategic vision of our shareholders and Board of Directors, we continue to progress steadily towards our Bank's objectives. We would like to thank all our customers, employees, and investors for their trust in and commitment to the Burgan brand.
