NOTES TO CONSOLIDATED FINANCIAL STATEMENTS AT 31 DECEMBER 2008

SECTION THREE

EXPLANATIONS ON ACCOUNTING POLICIES

I. BASIS OF PRESENTATION:

The Parent Bank maintains its books of accounts in Turkish Lira in accordance with the Banking Act No. 5411 (“Banking Act”), which is effective from 1 November 2005, the Turkish Commercial Code and Turkish tax legislation.

The consolidated financial statements are prepared in accordance with the “Regulation on the Principles and Procedures Regarding Banks’ Accounting Applications and Safeguarding of Documents” published in the Official Gazette No.26333 dated 1 November 2006 by the Banking Regulation and Supervision Agency (“BRSA”) which refers to “Turkish Accounting Standards” (“TAS”) and “Turkish Financial Reporting Standards”(“TFRS”) issued by the Turkish Accounting Standards Board (“TASB”) and other decrees, notes and explanations related to the accounting and financial reporting principles (all “Turkish Accounting Standards” or “TAS”) published by the BRSA. The format and the details of the publicly announced financial statements and related disclosures to these statements have been prepared in accordance with the “Communiqués Related to Publicly Announced Financial Statements of Banks and Explanations and Notes Related to these Financial Statements” published in the Official Gazette No.26430 dated 10 February 2007.

The consolidated financial statements have been prepared in TL, under the historical cost convention as modified in accordance with inflation adjustments until 31 December 2004, except for the financial assets and liabilities which are carried at fair value.

The preparation of consolidated financial statements in conformity with TAS requires the use of certain critical accounting estimates by the Group management to exercise its judgment on the assets and liabilities of the balance sheet and contingent issues as of the balance sheet date. These estimates are being reviewed regularly and, when necessary, suitable corrections are made and the effects of these corrections are reflected to the income statement.

The accounting policies and valuation principles applied in the preparation of these financial statements and valuation principles are defined and applied in accordance with TAS. Those accounting policies and valuation principles are explained in Notes II to XXIX below.

Additional paragraph for convenience translation into English:

The differences between accounting principles, as described in the preceding paragraphs and accounting principles generally accepted in countries in which these consolidated financial statements are to be distributed and International Financial Reporting Standards (“IFRS”) have not been quantified in these consolidated financial statements. Accordingly, these consolidated financial statements are not intended to present the financial position, results of operations and changes in financial position and cash flows in accordance with the accounting principles generally accepted in such countries and IFRS.

EXPLANATIONS ON ACCOUNTING POLICIES (Continued)

II. EXPLANATIONS ON STRATEGY OF USING FINANCIAL INSTRUMENTS AND FOREIGN CURRENCY TRANSACTIONS:

The general strategy of the Group of using financial instruments is to sustain an optimal balance between the yield of the instruments and their risks. The most important funding source of the Group is deposits. The Group can also sustain a lengthened liability structure by using long-term foreign currency borrowings from foreign financial institutions. Funds obtained from deposits and other sources are invested in high yield and quality financial assets and currency, interest rate and liquidity risks are being kept within the limits following the asset-liability management strategy. The currency, interest and liquidity risks of on-balance sheet and off-balance sheet assets and liabilities are managed accordingly within the risk limits accepted by the Group and the related legal limits. Derivative instruments are mainly utilised for liquidity needs and for mitigating currency and interest rate risks. The position of the Group as a result of foreign currency activities being held at minimum levels and the exposed currency risk is followed within the determined levels by the Board of Directors by considering the limits given by the Banking Law.

Foreign currency denominated monetary assets and liabilities are translated with the Parent Bank’s foreign currency bid rates prevailing at the balance sheet date. Gains and losses arising from such valuations are recognised in the income statement under the account of “Foreign exchange gains or losses”.

III. EXPLANATIONS ON INVESTMENTS IN ASSOCIATES, SUBSIDIARIES AND JOINT VENTURES:

Consolidated financial statements are prepared in accordance with the “Turkish Accounting Standard for Consolidated and Separate Financial Statements” (“TAS 27”).

Consolidation principles for subsidiaries:

Subsidiaries are entities controlled directly or indirectly by the Parent Bank.

Subsidiaries are consolidated using the full consolidation method on the grounds of materiality principle considering their operations, asset and equity sizes. Financial statements of related subsidiaries are consolidated from the date when the control is transferred to the Parent Bank.

Control means, directly or indirectly, holding the majority of the capital of an enterprise or although not having this majority, by holding privileged shares; or based on agreements made with other shareholders, holding the majority of the voting power or somehow having the power of dismissal or appointment of the majority of the members of the board of directors regarding the Parent Bank.

In the full consolidation method, 100% of subsidiaries’ assets, liabilities, income, expense and off-balance sheet items are combined with the Parent Bank’s assets, liabilities, income, expense and off-balance sheet items. The carrying amount of the Group’s investment in each subsidiary and the Group’s portion of the cost value of the capital of each subsidiary are eliminated. Intragroup balances and intragroup transactions and resulting unrealized profits and losses are eliminated. Minority interests in the net income of consolidated subsidiaries are identified and adjusted against the income of the Group in order to arrive at the net income attributable to the Group. Minority interests are presented in the consolidated balance sheet, in the shareholder’s equity. Minority interests are presented separately in the Group’s income.

Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Parent Bank.

The Group has no joint ventures or investment in associates as of 31 December 2008 and 31 December 2007.

EXPLANATIONS ON ACCOUNTING POLICIES (Continued)

IV. EXPLANATIONS ON FORWARD TRANSACTIONS, OPTIONS AND DERIVATIVE INSTRUMENTS:

Derivative instruments are measured at fair value on initial recognition and subsequently remeasured at their fair values. The accounting method of the income or loss arising from derivative instruments depends on the derivative being used for hedging purposes or not and depends on the type of the item being hedged.

The Group documents, at the inception of the transaction, the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedging transactions. The Group also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values of hedged items.

Changes in fair value of derivatives that are designated and qualify as fair value hedges are recorded in the income statement. If the hedge no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedge item for which the effective interest method is used is amortised to profit or loss over the period maturity.

Certain derivative transactions, even though they provide effective economic hedges under the Group’s risk management position, do not qualify for hedge accounting under the specific rules in “Turkish Accounting Standard for Financial Instruments: Recognition and Measurement (“TAS 39”)” and are therefore treated as “Financial assets at fair value through profit or loss”.

“Financial assets at fair value through profit or loss” are measured at fair value. If the fair value of derivative financial instruments is positive, it is disclosed under the main account “Financial assets at fair value through profit or loss” in “Trading derivative financial instruments” and if the fair value difference is negative, it is disclosed under “Trading derivative financial liabilities”. Differences in the fair value of trading derivative instruments are accounted under “Trading income/loss” in the income statement.

The fair values of the derivative financial instruments are calculated by using quoted market prices or by using discounted cash flow models.

Liabilities and receivables arising from the derivative instruments are followed in the off-balance sheet accounts from their contractual values.

V. EXPLANATIONS ON INTEREST INCOME AND EXPENSE:

Interest income and expenses are recognised in the income statement on an accrual basis by using the effective interest method.

The Group ceases accruing interest income on non-performing loans and, any interest income accruals from such loans are being reversed and no income is accounted until the collection is made according to the related regulation.

VI. EXPLANATIONS ON FEE AND COMMISSION INCOME AND EXPENSE:

All fees and commissions income/expenses are recognised on an accrual basis, except for certain commission income and fees from various banking services which are recorded as income at the time of collection. Fees and commissions income/expenses received/paid from/to the other institutions are recognised as transactional costs and recorded using the effective interest method. Contract-based fees or fees received in return for services such as the purchase and sale of assets on behalf of a third or legal person are recognised as income at the time of collection.

EXPLANATIONS ON ACCOUNTING POLICIES (Continued)

VII. EXPLANATIONS ON FINANCIAL ASSETS:

The Group classifies and accounts its financial assets as “Fair value through profit or loss”, “Available-for-sale”, “Loans and receivables” or “Held-to-maturity”. Sales and purchases of the financial assets mentioned above are recognised at the “settlement dates”. The appropriate classification of financial assets of the Group is determined at the time of purchase by the Bank management, taking into consideration the purpose of holding the investment.

a. Financial assets at fair value through profit or loss:

Financial assets, which are classified as “Financial assets at fair value through profit or loss”, are trading financial assets and are either acquired for generating profit from short-term fluctuations in the price or dealer’s margin, or are the financial assets included in a portfolio in which a pattern of short-term profit making exists independent from the acquisition purpose.

Trading financial assets are initially recognised at fair value and are subsequently re-measured at their fair value. However, if fair values cannot be obtained from the fair market transactions, it is accepted that the fair value cannot be measured reliably and that the financial assets are carried at “amortised cost” using the effective interest method. All gains and losses arising from these evaluations are recognised in the income statement. Interest earned while holding financial assets is reported as interest income and dividends received are included separately in dividend income.

Derivative financial instruments are treated as trading financial assets unless they are not designated as hedge instruments. The principles regarding the accounting of derivative financial instruments are explained in detail in Note IV. of Section Three.

b. Held-to-maturity financial assets:

Held-to-maturity financial assets are assets that are not classified under loans and receivables and held-for-trading at the time of acquisition and are not included in available-for-sale financial assets, with fixed maturities and fixed or determinable payments where management has the intent and ability to hold the financial assets to maturity. Held-to-maturity financial assets are initially recognised at cost which is considered as their fair value. The fair values of held-to-maturity financial assets on initial recognition are either the transaction prices at acquisition or the market prices of similar financial instruments. Held-to-maturity securities are carried at “amortised cost” using the effective interest method after their recognition. Interest income earned from held-to-maturity financial assets is reflected to the statement of income.

There are no financial assets that were previously classified as held-to-maturity but which cannot be subject to this classification for two years due to the violation of classification principles.

c. Loans and receivables:

Loans and receivables are financial assets which are created by providing money, services or goods to a debtor. Loans and receivables originated by the Parent Bank are carried initially at cost and subsequently recognised at the amortised cost value calculated using the effective interest method. The expenses incurred for the assets received as collateral are not considered as transaction costs and are recognised in the expense accounts.

The Group provides general and specific provisions based on the assessments and estimates of the management, by considering the “Communiqué Related to Principles and Procedures on Determining the Qualifications of Banks’ Loans and Other Receivables and the Provision for These Loans and Other Receivables” published in the Official Gazette No. 26333 dated 1 November 2006.

EXPLANATIONS ON ACCOUNTING POLICIES (Continued)

In this context, the revised credit risk, general structure of the current loan portfolio, financial conditions of the customers, non-financial information and economic conjuncture on the basis of the prudence principle are taken into consideration by the Parent Bank in determining the estimates.

Provision expenses are deducted from the net income of the year. If there is a collection from a receivable that is provisioned previously, the amount is deducted from the “Specific Provisions” account and recorded as an income to “Provision for Loan Losses and Other Receivables” shown as net with the provisions recorded in the year. Uncollectible receivables are written-off after all the legal procedures have been finalised.

d. Available-for-sale financial assets:

Available-for-sale financial assets are defined as financial assets other than the ones classified as “Loans and receivables”, “Held-to-maturity assets” or “Financial asset at fair value through profit or loss”.

Government bonds included in the available-for-sale financial assets are subsequently re-measured at fair value. When fair value calculations, based on market prices, cannot be obtained reliably, the available-for-sale financial assets are carried at amortised cost using the effective interest method. Available-for-sale equity securities that have a quoted market price in an active market and whose fair values can be reliably measured are carried at fair value. Available-for-sale equity securities that do not have a quoted market price in an active market and whose fair values cannot be reliably measured are carried at cost, less provision for impairment.

“Unrealised gains and losses” arising from changes in the fair value of financial assets classified as available-for-sale are recognised in the shareholders’ equity as “Marketable Securities Valuation Reserve”, until there is a permanent decline in the fair values of such assets or they are disposed of. When these financial assets are disposed of or impaired, the related fair value differences accumulated in the shareholders’ equity are transferred to the income statement.

VIII. EXPLANATIONS ON IMPAIRMENT OF FINANCIAL ASSETS:

Where the estimated recoverable amount of the financial asset, being the present value of the expected future cash flows discounted based on the effective interest method, or the fair value if one exists is lower than its carrying value, then it is concluded that the asset under consideration is impaired. A provision is made for the diminution in value of the impaired financial asset and it is charged against the income for the year.

The principles for the accounting of provisions for loans are explained in detail in Note VII of this Section.

IX. EXPLANATIONS ON OFFSETTING FINANCIAL ASSETS:

Financial assets and liabilities are offset and the net amount is reported in the balance sheet when the Group has a legally enforceable right to offset the recognised amounts and there is an intention to collect/pay related financial assets and liabilities on a net basis, or to realise the asset and settle the liability simultaneously.

X. EXPLANATIONS ON SALES AND REPURCHASE AGREEMENTS AND SECURITIES LENDING TRANSACTIONS:

Securities subject to repurchase agreements (“Repo”) are classified as “Financial assets at fair value through profit or loss”, “Available-for-sale” and “Held-to-maturity” according to the investment purposes of the Group and measured according to the portfolio to which they belong. Funds obtained from repurchase agreements are accounted under “Funds Provided under Repurchase Agreements” in liabilities and the difference between the sale and repurchase price is accrued over the life of repurchase agreements using the effective interest method.

Funds given against securities purchased under agreements (“Reverse repo”) to resell are accounted under “Receivables from Reverse Repurchase Agreements” on the balance sheet. The difference between the purchase and determined resell price is accrued over the life of repurchase agreements using the “effective interest method”. The Group has no securities lending transactions.

XI. EXPLANATIONS ON ASSETS HELD FOR RESALE AND DISCONTINUED OPERATIONS:

Assets held-for-resale consist of tangible assets that were acquired due to non-performing receivables, and are accounted in the financial statements in accordance with the “Communiqué Regarding the Principles and Procedures for the Disposals of Immovables and Commodities Acquired due to Receivables and for Trading of Precious Metal” published in the Official Gazette dated 1 November 2006, No. 26333.

The Group has no discontinued operations.

XII. EXPLANATIONS ON GOODWILL AND OTHER INTANGIBLE ASSETS:

a. Goodwill

The excess of the cost of an acquisition over the fair value of the Group’s share of the identifiable assets, liabilities or contingent liabilities of the acquired subsidiary at the date of acquisition of the control is recorded as goodwill and represents a payment made by the acquirer in anticipation of future economic benefits from assets that are not capable of being individually identified and separately recognised. The acquirer also recognises assets that are capable of being individually identified and separately recognised, intangible assets (i.e. trademarks) and contingent liabilities at fair value, irrespective of whether the asset had been recognised by the acquiree before the business combination; if it can be distinguished from the goodwill and if the asset’s fair value can be measured reliably.

In line with “Turkish Financial Reporting Standard for Business Combinations (“TFRS 3”), the goodwill is not subject to depreciation, but is tested annually for impairment and carried at cost less accumulated impairment losses, if any, in line with “Turkish Accounting Standard for Impairment on Assets” (“TAS 36”). For the purpose of impairment testing, goodwill acquired in a business combination must be allocated from the acquisition date to each of the acquirer’s cash generating units that are expected to benefit from the synergies of the business combination.

b. Other intangible assets

Intangible assets are measured at cost on initial recognition and any directly attributable costs of setting the asset to work for its intended use are included in the initial measurement. Subsequently, intangible assets are carried at historical costs after the deduction of accumulated amortization and the provision for value decreases, if any.

Intangibles are amortised over their estimated useful lives using the straight-line method. The useful life of the asset is determined by assessing the expected useful life of the asset, technical, technological and other kinds of obsolescence and all required maintenance expenses necessary to utilise the economic benefit of the asset and differs from 3 years to 15 years.

XIII. EXPLANATIONS ON PROPERTY AND EQUIPMENT:

Property and equipment is measured at its cost when initially recognised and any directly attributable costs of setting the asset in working order for its intended use are included in the initial measurement. Subsequently, property and equipment are carried at cost less accumulated depreciation and provision for value decrease, if any.

The Group has adopted the “revaluation method” in accordance with the “Communiqué Regarding the Principles and Procedures for the Tangible Assets (“TAS 16”)” for its buildings. Independent expert appraisal values are presented in the financial statements. However, the revaluation amount of the building acquired within the context of the financial lease agreement explained in detail in Section Five Note b.4 of Part VII is presented in the financial statements by considering the sales option regarding the share transfer of the Group.

Depreciation is calculated over the cost of property and equipment using the straight-line method. The depreciation rates are stated below:

Buildings	2%
Movables, Movables Acquired by Financial Leasing	5-50%

The depreciation charge for items remaining in property and equipment for less than an accounting period at the balance sheet date is calculated in proportion to the period the item remained in property and equipment.

Where the carrying amount of an asset is greater than its estimated “Recoverable amount”, it is written down to its “Recoverable amount” and the provision for the diminution in value is charged to the income statement.

Gains and losses on the disposal of property and equipment are determined by deducting the net book value of the property and equipment from its sales revenue.

Expenditures for the repair and renewal of property and equipment are recognised as expense. The capital expenditures made in order to increase the capacity of the tangible asset or to increase its future benefits are capitalised on the cost of the tangible asset. The capital expenditures include the cost components which are used either to increase the useful life or the capacity of the asset, or the quality of the product or to decrease the costs.

XIV. EXPLANATIONS ON LEASING TRANSACTIONS:

Assets acquired under finance lease agreements are capitalised at the inception of the lease at the “lower of the fair value of the leased asset or the present value of the amount of cash consideration given for the leased asset. The Group has implemented the “revaluation method” in accordance with the “Communiqué Regarding the Principles and Procedures for the Tangible Assets (“TAS 16”)” while revaluating the buildings. The revaluation amount of the building acquired within the extent of financial lease agreement is presented in the financial statements by considering the sales commitment regarding the share transfer of the Parent Bank.

Leased assets are included in the property and equipment and depreciation is charged on a straight-line basis over the useful life of the asset. If there is any diminution in value of the leased asset, a “Provision for value decrease” is recognised. Liabilities arising from the leasing transactions are included in “Financial Lease Payables” on the balance sheet. Interest and foreign exchange expenses regarding lease transactions are charged to the income statement. The Group realizes financial leasing transactions in the capacity of “lessor” by means of EFG Finansal Kiralama A.Ş. which is the consolidated subsidiary of the Group. The asset subject to financial leasing is disclosed as net financial leasing receivable in the balance sheet. The interest income is determined in a way to form a fixed revenue return ratio using net investment method related to leased asset of the lessor, and the portion of interest income which does not take part in the related term is followed under unearned interest income account.

Transactions regarding operational lease agreements are accounted on an accrual basis in accordance with the terms of the related contracts.

XV. EXPLANATIONS ON PROVISIONS AND CONTINGENT COMMITMENTS:

Provisions and contingent liabilities except for the specific and general provisions recognised for loans and other receivables are accounted in accordance with the “Turkish Accounting Standard for Provisions, Contingent Liabilities and Contingent Assets” (“TAS 37”).

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. The provision for contingent liabilities arising from past events should be recognised in the same period of occurrence in accordance with the “Matching principle”. When the amount of the obligation cannot be estimated and there is no possibility of an outflow of resources from the Group, it is considered that a “Contingent” liability exists and it is disclosed in the related notes to the financial statements.

XVI. EXPLANATIONS ON CONTINGENT ASSETS:

Contingent assets usually arise from unplanned or other unexpected events that give rise to the possibility of an inflow of economic benefits to the entity. Contingent assets are not recognised in financial statements since this may result in the recognition of income that may never be realised. Contingent assets are disclosed where an inflow of economic benefits is probable. Contingent assets are assessed continually to ensure that developments are appropriately reflected in the financial statements. If it has become virtually certain that an inflow of economic benefits will arise, the asset and the related income are recognised in the financial statements in which the change occurs.

XVII. EXPLANATIONS ON OBLIGATIONS RELATED TO EMPLOYEE RIGHTS:

Obligations related to employee termination and vacation rights are accounted for in accordance with “Turkish Accounting Standard for Employee Rights” (“TAS 19”) and are classified under “Reserve for Employee Rights” account in the balance sheet.

Under the Turkish Labour Law, the Group is required to pay a specific amount to the employees who have retired or whose employment is terminated other than the reasons specified in the Turkish Labour Law. The reserve for employment termination benefits represents the present value of the estimated total reserve for the future probable obligation of the Group arising from this liability.

XVIII. EXPLANATIONS ON TAXATION :

a. Current tax:

Many clauses of Corporate Tax Law No. 5520 which are valid starting from 1 January 2006, was taken into effect after being published in the Official Gazette dated 21 June 2006 No. 26205. According to the New Tax Law, the corporate tax rate in Turkey is payable at the rate of 20% for 2008 (2007: 20%). The corporate tax rate is calculated on the total income after adjusting for certain disallowable expenses, exempt income and other allowances. No further tax is payable unless the profit is distributed.

Dividends paid to non-resident corporations, which have a place of business in Turkey or to resident corporations are not subject to withholding tax. Otherwise, dividends paid are subject to withholding tax at the rate of 15%. An increase in capital via issuing bonus shares is not considered as profit distribution and thus does not incur withholding tax.

Corporations are required to pay advance corporate tax quarterly at a rate of 20% on their corporate income. Advance tax is declared by the 14th and paid by the 17th day of the second month following each calendar quarter end. Advance tax paid by corporations which is for the current period is credited against the annual corporation tax calculated on their annual corporate income in the following year. Despite the offset, if there is temporary prepaid tax remaining, this balance can be refunded or used to offset any other financial liabilities to the government.

A 75% portion of the capital gains derived from the sale of equity investments and immovable properties held for at least two years is tax exempt, if such gains are added to paid-in capital or held in a special account under shareholder’s equity for five years.

Under the Turkish Corporate Tax Law, losses can be carried forward to offset against future taxable income for up to five years. Losses cannot be carried back to offset profits from previous periods.

In Turkey, there is no procedure for a final and definitive agreement on tax assessments. Tax returns are required to be filled and delivered to the related tax office until the evening of the 25th of the fourth month following the balance sheet date. Tax returns are open for five years from the beginning of the year following the date of filing during which period the tax authorities have the right to audit tax returns, and the related accounting records on which they are based, and may issue re-assessments based on their findings.

XXII. EXPLANATIONS ON GOVERNMENT GRANTS:

As of 31 December 2008 and 31 December 2007, the Group has no government grants.

XXIII. EXPLANATIONS ON PROFIT RESERVES AND PROFIT DISTRIBUTION:

Retained earnings as per the statutory financial statements other than legal reserves are available for distribution, subject to the legal reserve requirement referred to below.

Under the Turkish Commercial Code (“TCC”) the legal reserves are composed of first and second reserves. The TCC requires first reserves to be 5% of the profit until the total reserve is equal to 20% of issued and fully paid-in share capital. Second reserves are required to be 10% of all cash profit distributions that are in excess of 5% of the issued and fully paid-in share capital. However holding companies are exempt from this application. According to the Turkish Commercial Code, legal reserves can only be used to compensate accumulated losses and cannot be used for other purposes unless they exceed 50% of paid-in capital.

XXIV. EXPLANATIONS ON EARNINGS PER SHARE:

Earnings per share disclosed in the income statement are calculated by dividing net profit/(loss) for the year to the weighted average number of shares outstanding during the period concerned.

	30 December 2008	31 December 2007
Net Income / (Loss) to be Appropriated to Ordinary Shareholders	36.085	24.047
Weighted Average Number of Issued Ordinary Shares (Thousand)	23.000.000	14.000.000
Earnings Per Ordinary Shares (Disclosed as 1.000 nominal in full TL)	1,569	1,718
Net Income / (Loss) to be Appropriated to Privileged Shareholders	4.010	2.672
Weighted Average Number of Issued Privileged Shares (Thousand)	1.000.000	1.000.000
Earnings Per Privileged Shares (Disclosed as 1.000 nominal in full TL)	4,010	2,672

In Turkey, companies can increase their share capital by making a pro-rata distribution of shares (“bonus shares”) to existing shareholders from retained earnings. For the purpose of earnings per share computations, the weighted average number of shares outstanding during the year has been adjusted in respect to bonus shares issued without a corresponding change in resources by giving them a retroactive effect for the year in which they were issued and for each earlier period.

XXV. EXPLANATIONS ON RELATED PARTIES:

For the purpose of these financial statements, shareholders, key management personnel and board members together with their families and companies controlled by/affiliated with them, and associated companies are considered and referred to as related parties in accordance with “Turkish Accounting Standard for Related Parties” (“TAS 24”). INFORMATION RELATED TO FINANCIAL POSITION OF THE GROUP (Continued)

II. EXPLANATIONS ON CONSOLIDATED CREDIT RISK:

Credit risk represents the risks and losses that could arise when the other party in a contract to which the Group is a party, does not comply with the requirements of the contract and cannot timely fulfill its liabilities either completely or partly. With respect to credit risk, debtor and debtor groups are subject to risk limitations envisaged in the Banking Law. There is no risk limitation in terms of geographical region. Sectoral concentration limit has been specified as 30% in the Bank Risk Parameters. Credit limits allocated are subject to revision once a year. When a revision becomes due, limits for which the credit worthiness has not been reviewed are suspended (except for cash provisions).

Regarding the maintenance of credit risk under control, there are other limitations in the scope of the Parent Bank Risk Parameters apart from the Banking Law limitations related to Management Levels’ Authority limits in credit allocation.

Limits regarding credit extension are specified as:

- Authority to decide to make a credit available within preapproved limits belongs to the Branch Manager. However, the Branch Manager can delegate this authority to the Marketing Unit Director in writing.
- Maturity extension authority belongs to the Corporate Credits Allocation Director; it cannot be delegated.
- Providing the circumstances set by Board of Directors, credit limit transfer is under the authorization of Branch Manager.
- No transaction can be put into effect without a General Credit Contract (except for Financial Institutions).
- No credit can be allocated to firms with total negative equity except for credits with cash collateral.

The creditworthiness of debtors of credit and other receivables is periodically followed-up in accordance with the relevant legislation. Account status documents taken for the credits have been audited in the manner specified in the legislation. However, account status documents do not need to be audited for cash-based transactions. As a result of the periodical follow-up of creditworthiness, credit limits are changed, when necessary. Taking the creditworthiness into account, collaterals are received for credits and other receivables. With the aim of controlling the credit risk, certain limitations exist in the Bank’s Risk Parameters in relation to customer selection. According to this:

- Credits shall not be given for speculative purposes,
- Credits shall also not be given to real or legal persons who have been subjected to sequestration, bankruptcy and schemes of arrangement with creditors and those who have bounced cheques and notes without an acceptable explanation.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS AT 31 DECEMBER 2008

(Unless otherwise stated amounts are expressed in thousands of Turkish Lira (“TL”).)

INFORMATION RELATED TO FINANCIAL POSITION OF THE GROUP (Continued)

The Parent Bank’s derivative transactions are mainly composed of foreign exchange and interest rate swaps, money and interest options and forward transactions. The credit risks of these products are managed by deducting them from the company's credit limit in proportion to the term of the transaction. Market risk is managed by the Treasury.

In forward transactions no type of coercive action outside of the other party’s consent is taken. Such transactions are rare, and normally never occur.

Indemnified non-cash credits are subjected to the same risk weight as the credits which are past due date.

With regard to the credits renewed and re-structured with a new payment plan by the Parent Bank, the method adopted is the one specified by the relevant legislation. Within the framework of risk management systems a risk separation is not practiced as to the maturity of the liabilities.

The Group does not perform any kind of banking activity abroad.

When evaluated within the context of the financial operations of other financial institutions acting as active participants in the international banking market, the Group does not have significant credit risk concentration.

In the current period, the share of the Group’s receivables due to cash loans extended to its 100 largest customers is 35% (31 December 2007: 38%) within the total cash loan portfolio.

In the current period, the share of the Group’s receivables due to non-cash loans extended to its 100 largest customers is 52% (31 December 2007: 51%) within the total non-cash loans portfolio.

In the current period, the share of the Group’s receivables due to the total of cash and non cash loans extended to its 100 largest customers is 44% (31 December 2007: 43%) within cash loans in balance sheet and non-cash loans in off-balance sheet.

As of 31 December 2008, the Group’s general loan loss provision is amounting to TL12.127 (31 December 2007: TL8.526).

III. EXPLANATIONS ON CONSOLIDATED MARKET RISK:

Risk calculations are performed both with the standard method and the internal method. Regular legal reporting is performed on a weekly and monthly basis with the standard method. Fluctuations in risks are actively followed and are communicated to the top management. The Market Risk Committee also reports legally on a consolidated basis quarterly. The limitations in the treasury risk parameters, as approved by the Board of Directors, are summarized as follows:

- Position limit, maximum loss limit and minimum holding period for the available-for-sale, trading and held-to-maturity portfolio,
- Position limit, maximum loss limit and minimum holding period for derivative products,
- Distinct position limit and maximum loss limit of each foreign currency unit and total foreign currency.

Limit and risk monitoring for treasury operations, the calculation of risk parameters and various control processes have been more effectively performed with the implementation of Kondor program in 2008.

The below table represents the details of the “Calculation of Market Risk with Standard Method” in accordance with the “Regulation Regarding Measurement and Evaluation of Banks’ Capital Adequacy Ratio” published in the Official Gazette No.26333 dated 1 November 2006, namely “Calculation of Market Risk with Standard Method”.

IV. EXPLANATIONS ON CONSOLIDATED OPERATIONAL RISK:

As of 31 December 2008, the Group calculates the amount subject to operational risk based on “Basic Indicator Method” by using the last three year-end gross income balances of the Group, in accordance with Regulation Regarding Measurement and Evaluation of Banks’ Capital Adequacy Ratio.

V. EXPLANATIONS ON CONSOLIDATED CURRENCY RISK:

The difference between the Group’s foreign currency denominated and foreign currency indexed on- and off-balance sheet assets and liabilities is defined as the “Net Foreign Currency Position” and it is the basis of currency risk. Another important dimension of the currency risk is the change in the exchange rates of different foreign currencies in “Net Foreign Currency Position” (cross currency risk).

A series of limits for the tenure of spot and forward foreign exchange positions is set in the risk parameters section of the budget approved by the Board of Directors annually. There is a conservative foreign currency position management policy in the Group due to the free floating currency regime.

VI. EXPLANATIONS ON CONSOLIDATED INTEREST RATE RISK:

Interest rate risk is the risk that expresses the effects of fluctuations in the market interest rates on the value increase/decrease of the Group’s interest rate sensitive assets and liabilities. The interest sensitivity of risks regarding the interest rate both on the on-balance sheet and off-balance sheet are monitored following several analyses and are discussed in Asset and Liability Committee bi weekly.

The Parent Bank’s Asset and Liability Committee determines the assets and liability management policy by assessing the relationship between market rates and net interest income due to repricing characteristics of interest-earning assets and interest-bearing liabilities.

The Parent Bank closely monitors the maturity gap between liabilities and assets that may arise in the balance sheet to manage the interest rate risk better. Liquidity management is critical in the combination of investments, available-for-sale assets and the trading portfolio. Through using these precautions, the possible loss effects on the shareholders’ equity due to both credit risk and interest risk during the volatile periods of the market are minimised.

VII. EXPLANATIONS ON CONSOLIDATED LIQUIDITY RISK:

Liquidity risk is the risk arising from not having adequate cash or not having adequate cash inflows to fund cash outflows on time due to the imbalance of cash flows. This risk is eliminated by having banks and placements with short-term maturities, liquid and sellable marketable securities portfolios and sound equity structure, and unused borrowing resources. When volatility in the markets arises, the Board of Directors can decrease the limits of all existing placements without considering the credit worthiness.

The Parent Bank’s management and Asset Liability Committee follow-up the interest margin on the diversified maturities between assets and liabilities, and monitor the model studies to measure the possible margin cost of the payments and sudden outflows in the scope of scenario analyses.

When the foreign markets are appropriate, the Parent Bank periodically uses long-term borrowings in terms of foreign currency for its long-term liquidity requirement. The Central Bank, ISE Repo Market, Interbank Money Market and banks’ transaction limits which can be used for sudden outflows in the short-term are utilised at a minimum level. The Parent Bank does not need these funds due to the existing liquidity position but utilises the funds for the opportunities of short-term transactions.

In accordance with the “Regulation on Measurement and Assessment of Liquidity Adequacy of the Banks”, which came into effect after its publication in the Official Gazette numbered 26333 on 1 November 2006 by BRSA, weekly simple arithmetic average of total liquidity adequacy ratio related to the first maturity period, and total liquidity adequacy ratio related to the second maturity period cannot be less than a hundred percent; weekly simple arithmetic average of the foreign currency liquidity adequacy ratio related to first maturity period, and foreign currency liquidity adequacy ratio related to second maturity period cannot be less than eighty percent as of 1 June 2008. In accordance with the regulation published on 5 April 2008, the weekly simple arithmetic average of the ratio of assets which are calculated with hundred percent weight with stock values to liabilities cannot be less than seven percent. This ratio is applied as five percent in first three months period and six percent in the second three months period following the publication of the regulation. Liquidity ratios realized in 2008 are as follows:

	First Maturity Period		Second Maturity Period		Stock Values
	FC	FC + TL	FC	FC + TL	FC + TL
Average (%)	147,36	273,12	110,51	182,58	9,30

VIII. EXPLANATION REGARDING THE PRESENTATION OF FINANCIAL ASSETS AND LIABILITIES AT THEIR FAIR VALUES:

The fair values of held-to-maturity assets are determined based on market prices or when this price is not available, based on market prices quoted for other securities subject to the same redemption qualifications in terms of interest, maturity and other similar conditions.

The expected fair value of the demand placements and deposits represents the amount to be paid upon request. The expected fair value of the fixed rate deposits is determined by calculating the discounted cash flow using the Parent Bank’s current interest rates as of balance sheet date.

The expected fair value of loans and receivables are determined by calculating the discounted cash flows using the Parent Bank’s current interest rates for fixed interest loans. For the loans with floating interest rates, it is assumed that the carrying value reflects the fair value.

The expected fair value of bank placements, money market placements and bank deposits are determined by calculating the discounted cash flows using the current market interest rates of similar assets and liabilities.

The following table summarises the carrying values and fair values of some financial assets and liabilities of the Group.

	Carrying Value		Fair Value

2. Information on reserve for employment termination benefits:

Under the Turkish Labour Law, the Group is required to pay a specific amount to the employees who have been working more than one year, when employment is terminated due to obligatory reasons or they retire, when they have fulfilled 25 working years (women 20) and are eligible for retirement (for women 58 years, for men 60 years), when they have been called up for military service or when they die. After the amendment of legislation on 23 May 2002, some of the transition process articles related to the working period before retirement were enacted.

The payment amount which is one month's salary for each working year is restricted to TL2.173,18 (31 December 2007: TL2.030,19). Employee termination benefits are not funded as there is no funding requirement.

In accordance with Turkish Labour Law, the reserve has been calculated by estimating the present value of the future probable obligation of the Group arising from the retirement of its employees. TAS 19 necessitates the actuarial valuation methods to calculate liabilities of enterprises. Independent actuaries are used in determining the liability of the Group. There are assumptions in the calculation as discount rate, employee turnover and expected salary increases. In this context, the following actuarial assumptions were used in the calculation of total liabilities.

	31 December 2008	31 December 2007
Discount rate (%)	6,26	5,71
Salary increase rate (%)	6,40	7,00
Average remaining work period (Year)	10,82	10,24
